Liberator: the Harley-Davidson WLA in the Second World War Robert Kim, 2015-02-04 The Harley Davidson WLA and other American military motorcycles performed crucial roles during the Second World War in the U S armed forces and other Allied armies worldwide. *Liberator: The Harley Davidson WLA in the Second World War* for the first time tells the full story of how the U S Army and Marine Corps and other Allied armed forces used the Harley Davidson WLA and other American military motorcycles during the war. The book traces the development of the WLA in 1940-42 from the civilian Forty Five models of 1929-39, describes the evolution of U S Army and Marine Corps usage of motorcycles through the motorcycle borne mechanized cavalry experiments of 1940-41 and addresses wartime use of motorcycles in each major type of U S Army unit: mechanized cavalry, armored divisions, infantry divisions, airborne divisions, military police, etc. and in Marine Divisions with detailed tables of organization and equipment for each. Moreover, *Liberator: The Harley Davidson WLA in the Second World War* describes the use of the WLA, Indians and other Harley Davidsons in each Allied army that used them. It especially emphasizes their use by the Soviet Union, which was the largest user of the WLA, receiving more through Lend Lease than the number used by the U S armed services. These countries include Soviet Union, Canada, United Kingdom, Australia, New Zealand, South Africa, India, Poland, France, Brazil, Iran, Republic of China. Although primarily focused on the Harley Davidson WLA, the book also describes use of other Harley Davidsons, Indians and small motorcycles designed for airborne troops in the U S armed services and other allied armies. These other models include Harley Davidson WL, Harley Davidson Big Twins, Indian 741, 640, 344 and 340, Cushman Model 53 scooter, Simplex, Servicycle. Unique human perspectives on the Harley Davidson WLA and other American military motorcycles during the war come from the stories of several individual U S Army soldiers who fought on motorcycles and the histories of a U S Army military police unit and a Red Army motorcycle battalion. These stories, several of them previously unpublished, are reminders of the men who once rode these machines during the war. This book will be of interest to enthusiasts of Harley Davidson, Indian and military motorcycles and to military historians and preservationists worldwide. *United States Army in World War II*, United States. where they helped breach the Gothic Line the Germans last major defensive line of the Italian Campaign After the war the 758th was deactivated but was reformed as the 64th Tank Battalion keeping their distinguished insignia a tusked elephant head over the motto We Pierce They entered the Korean War still segregated but returned fully integrated though discrimination continued internally Through the years they fought with almost every American tank the Stuart the Sherman the Pershing the Patton and today s Abrams Victorious over two fascist and racist regimes many black servicemen returned home to what they hoped would be a more tolerant nation Most were bitterly disappointed segregation was still the law of the land For many disappointment became a determination to fight discrimination with the same resolve that had defeated the Axis

An Alternative History of Bicycles and Motorcycles Steven E. Alford, Suzanne Ferriss, 2016-04-06 An Alternative History of Bicycles and Motorcycles Two Wheeled Transportation and Material Culture accounts for the nineteenth century creation and development of two wheeled vehicles both human powered and motorized Specifically the book focuses on the period from 1885 which saw the appearance simultaneously of the Safety bicycle and the Einspur the first motorcycle to 1920 while exploring implications for later bicycling and motorcycling We argue that invention of these vehicles rather than the product of gifted individuals should be seen as the consequence of a number of historical economic cultural and political forces that intersect so unpredictably that the notion of a genius inventor is reductive The common evolutionary model of development from the bicycle to the motorcycle oversimplifies both the technology and its origins Stripping the vehicles of all their material and cultural associations such a model fails to advance our understanding of the devices their creators and their riders Taking a contemporary vehicle and tracing its lineage creates a false sense of evolutionary necessity in its creation and fails to account for the many possible developmental paths that were for whatever reason abandoned By contrast our book adopts a material culture approach a form of inquiry that stresses the connections between artifacts and social relations We consider not simply the bicycle and motorcycle as material objects but focus also on the complex socio political and economic convergences that produced the materials materials that in turn themselves shaped the vehicles appearance function and adoption by riders
