Recoding America Jennifer Pahlka, 2023-06-13 Named one of NPR s Best Books of 2023 Named one of Ezra Klein s Books That Explain Where We Are in 2023 The New York Times Learn more about Jennifer Pahlka s work at recodingamerica.us The book I wish every policymaker would read Ezra Klein The New York Times A bold call to reexamine how our government operates and sometimes fails to from President Obama s former deputy chief technology officer and the founder of Code for America Just when we most need our government to work to decarbonize our infrastructure and economy to help the vulnerable through a pandemic to defend ourselves against global threats it is faltering Government at all levels has limped into the digital age offering online services that can feel even more cumbersome than the paperwork that preceded them and widening the gap between the policy outcomes we intend and what we get But it s not more money or more tech we need Government is hamstrung by a rigid industrial era culture in which elites dictate policy from on high disconnected from and too often disdainful of the details of implementation Lofty goals morph unrecognizably as they cascade through a complex hierarchy But there is an approach taking hold that keeps pace with today s world and reclaims government for the people it is supposed to serve Jennifer Pahlka shows why we must stop trying to move the government we have today onto new technology and instead consider what it would mean to truly recode American government *Civic Education for Diverse Citizens in Global Times* Beth C. Rubin, James M. Giarelli, 2013-10-11 This book explores four interrelated themes rethinking civic education in light of the diversity of U S society re examining these notions in an increasingly interconnected global context re considering the ways that civic education is researched and practiced and taking stock of where we are currently through use of an historical understanding of civic education There is a gap between theory and practice in social studies education while social studies researchers call for teachers to nurture skills of analysis decision making and participatory citizenship students in social studies classrooms are often found participating in passive tasks e g quiz and test taking worksheet completion listening to lectures rather than engaging critically with the

curriculum Civic Education for Diverse Citizens in Global Times directed at students researchers and practitioners of social studies education seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory

Beyond the Boundaries Georgia A. Persons,2017-09-29 In the past African American aspirations for political office were assumed to be limited to areas with sizeable black population bases By and large black candidates have rarely been successful in statewide or national elections This has been attributed to several factors limited resources available to African American candidates or identification with a black liberationist ideological thrust Other factors have been a relatively small and spatially concentrated primary support base of black voters and the

persistent resistance of many white voters to support black candidates For these reasons the possibility of black candidates winning elections to national office was presumably just a dream Conventional wisdom conceded a virtual cap on both the possible number of black elected officials and the level of elective office to which they could ascend But objective political analysis has not always made sufficient allowances for the more universal phenomenon of individual political ambitions The contributors to this volume explore the ways ambitious individuals identified and seized upon strategies that are expanding the boundaries of African American electoral politics This volume is anchored by a symposium that focuses on new possibilities in African American politics Both the electoral contests of 2006 and the Barack Obama presidential campaign represent an emergent dynamic in American electoral politics Analysts are beginning to agree that the contours of social change now make the electoral successes of black candidates who are perceived as ideologically and culturally mainstream increasingly likely The debate captured in this volume will likely inspire further scholarly inquiry into the changing nature and dimensions of the larger dynamic of race in American politics and the subsequent changing political fortunes of African American candidates
