reference work for those interested in international humanitarian law The International Criminal Responsibility of War's Funders and Profiteers Nina H. B. Jørgensen, 2020-09-17 This book is about money war atrocities and economic actors about the connections between them and about responsibility **The Law of Targeting** William H. Boothby, 2012-08-16 Targeting is the primary method for securing strategic objectives in an armed conflict Failure to comply with the law of targeting jeopardizes the achievement of those aims It is therefore essential that all those involved in or studying issues surrounding targeting have an accurate and complete understanding of this area of law This book offers the definitive and comprehensive statement of all aspects of the law of targeting It is a one stop shop that answers all relevant questions in depth It has been written in an open accessible yet comprehensive style and addresses both matters of established law and issues of topical controversy The text explains the meanings of such terms as civilian combatant and military objective Chapters are devoted to the core targeting principles of distinction discrimination and proportionality as well as to the relationship between targeting and the protection of the environment and of objects and persons entitled to special protection New technologies are also covered with chapters looking at attacks using unmanned platforms and a discussion of the issues arising from cyber warfare The book also examines recent controversies and perceived ambiguities in the rules governing targeting including the use of human shields the level of care required in a bombing campaign and the difficulties involved in determining whether someone is directly participating in hostilities This book will be invaluable to all working in this contentious area of law The International Committee of the Red Cross and its Mandate to Protect and Assist Christy Shucksmith, 2017-08-24 The purpose of this book is to consider the legality of the changing practice of the International Committee of the Red Cross ICRC It provides extensive legal analysis of the ICRC as an organisation legal person and humanitarian actor It draws on the law of organisations International Humanitarian Law International Human Rights Law and other relevant branches of international law in order to critically assess the mandate and practice of the ICRC on the ground The book also draws on more abstract human centric concepts including sovereignty as responsibility and human security in order to assess the development of the concept of humanity for the mandate and practice of the ICRC Critically this book uses semi structured interviews with ICRC delegates to test the theoretical and doctrinal conclusions The book provides a unique insight into the work of the ICRC It also includes a case study of the work of the ICRC in the Democratic Republic of Congo Ultimately the book concludes that the ICRC is no longer restricted to the provision of humanitarian assistance on the battlefield It is increasingly drawn into long term and extremely complicated conflicts in which civilians soldiers and non State actors intermingle In order to remain useful for the people on the ground therefore the ICRC is progressively developing its mandate This book questions whether on occasion this could threaten its promise to remain neutral impartial and independent Finally however it should be said that this author finds that the work of the ICRC is unparalleled on the international stage and its humanitarian mandate is a vital component for those embroiled in the undertaking of and recovery

Cyberwar Jens David Ohlin, Kevin Govern, Claire Oakes Finkelstein, 2015 Cyber weapons and cyber warfare have become one of the most dangerous innovations of recent years and a significant threat to national security Cyber weapons can imperil economic political and military systems by a single act or by multifaceted orders of effect with wide ranging potential consequences Unlike past forms of warfare circumscribed by centuries of just war tradition and Law of Armed Conflict prohibitions cyber warfare occupies a particularly ambiguous status in the conventions of the laws of war Furthermore cyber attacks put immense pressure on conventional notions of sovereignty and the moral and legal doctrines that were developed to regulate them This book written by an unrivalled set of experts assists in proactively addressing the ethical and legal issues that surround cyber warfare by considering first whether the Laws of Armed Conflict apply to cyberspace just as they do to traditional warfare and second the ethical position of cyber warfare against the background of our generally recognized moral traditions in armed conflict The book explores these moral and legal issues in three categories First it addresses foundational questions regarding cyber attacks What are they and what does it mean to talk about a cyber war The book presents alternative views concerning whether the laws of war should apply or whether transnational criminal law or some other peacetime framework is more appropriate or if there is a tipping point that enables the laws of war to be used Secondly it examines the key principles of *jus in bello* to determine how they might be applied to cyber conflicts in particular those of proportionality and necessity It also investigates the distinction between civilian and combatant in this context and studies the level of causation necessary to elicit a response looking at the notion of a proximate cause Finally it analyzes the specific operational realities implicated by particular regulatory regimes This book is unmissable reading for anyone interested in the impact of cyber warfare on international law and the laws of war

Military Necessity in International Cultural Heritage Law Berenika Drazewska, 2021-12-13 This book offers the first comprehensive scholarly analysis of the current meaning and scope of military necessity a key concept in the international legal framework for the protection of cultural heritage during armed conflicts since the adoption of the 1954 Hague Convention Academic discussions commonly view military necessity uniquely through the lens of international humanitarian or international criminal law In her book Berenika Drazewska presents a more comprehensive perspective examining developments across various strands of international law arisen since 1954 This novel approach demonstrates how international cultural heritage law affords a particularly strict meaning to military necessity As a result the relative waiver will only be available to belligerents very rarely in truly extraordinary circumstances Drazewska's *Military Necessity in International Cultural Heritage Law* engages a significant issue in this rapidly evolving field of international law the inclusion of necessity in regulation of the protection of

cultural heritage during armed conflict after 1945 Its very inclusion was viewed as a major concession which is only multiplied because of the difficulties of its application on the ground This thorny issue has come to the fore again with large scale cultural losses inflicted during recent armed conflicts Elegantly written and scholarly in its approach this book places this question and possible answers to it within the broader sweep of international law and recent developments not only in international humanitarian law but state responsibility international criminal law and international criminal law It offers a significant and timely reexamination and reconceptualization of this important topic Prof Ana Filipa Vrdoljak UNESCO Chair in International Law Cultural Heritage Faculty of Law University of Technology Sydney
