Environment and the City Joe Ravetz,Clive George,Joe Howe,2004-07-15 For the first time at the beginning of the twenty first century urban dwellers outnumber rural residents and this trend is set to continue Consequently one of the most pressing issues of our time is how to square the social and economic development of cities with their environmental limits and those of the wider environment The theme of the environment and city is topical at every level from the politics of global trade to local community networks Environment and the City looks at the evolution of

cities in the developed and the developing world and the implications for resource consumption and environmental impacts. It takes a cross cutting approach with new thinking on multiple geographies, the configuration of networks, exclusion, consumption, risk and ecological footprint. Urban environmental themes and their related social, economic and political agendas are outlined. In turn, the environmental impacts and environmental agendas relating to key sectors of the urban economy are discussed. The global context to such issues is then explored before the practical tools and methods of urban environmental management are investigated. The theme of the sustainable city emerges from this not so much as a standard menu but as a learning process between all sections of society. This book, a valuable resource, provides a concise, accessible route map for all students interested in the environmental issues emanating from our urban society. Written to aid student understanding, the easily navigable text features boxed practical examples, discussion points, signposts to reading and websites and a glossary.

City Requiem, Calcutta Ananya Roy, 2003. Housing developments emerge amid the paddy fields on the fringes of Calcutta; overflowing trains carry peasant women to informal urban labor markets in a daily commute against hunger; land is settled and claimed in a complex choreography of squatting and evictions. Such, Ananya Roy contends, are the distinctive spaces of a communism for the new millennium where, at a moment of liberalization, the hegemony of poverty is quietly reproduced. An ethnography of urban development in Calcutta, Roy's book explores the dynamics of class and gender in the persistence of poverty. *City Requiem, Calcutta* emphasizes how gender itself is spatialized and how gender relations are negotiated within the geopolitics of modernity and through the everyday practices of territory. Thus, Roy shows how urban developmentalism in its populist guise reproduces the relations of masculinist patronage and in its entrepreneurial guise seeks to reclaim a bourgeois Calcutta gentlemanly in its nostalgias. In doing so, her work expands the field of poverty studies by showing how a politics of poverty is also a poverty of knowledge, a construction and management of social and spatial categories.

The coverage is comprehensive, ranging from the economic and political dimensions of the capitalist system to the issues of poverty and deprivation and questions about housing equity. This is an essential reference guide to social, economic and environmental problems in urban areas, which is of great value to students of planning, urban studies, geography and sociology.
