From: Commander, Naval Surface Force, U.S. Pacific Fleet  
Commander, Naval Surface Force Atlantic

Subj: SURFACE FORCE TRAINING AND READINESS MANUAL

1. Purpose

a. This is a joint Commander, Naval Surface Force, U.S. Pacific Fleet (COMNAVSURFPAC)/Commander, Naval Surface Force Atlantic (COMNAVSURFLANT) instruction to promulgate a Surface Force Training and Readiness Manual (SFTRM) to be used by Naval Surface Force ships, staffs, and units in execution of the Optimized Fleet Response Plan (OFRP).

b. This update aligns surface force training and readiness throughout the Optimized Fleet Response Plan (OFRP). It reflects updated mission areas, changes to advanced and integrated training requirements, and modifies assessment guidance based on lessons learned and fleet feedback.

2. Cancellation. COMNAVSURFPAC/COMNAVSURFLANTINST 3500.10A, COMNAVSURFPAC/COMNAVSURFLANTINST 3500.11A, COMNAVSURFPAC/COMNAVSURFLANTINST 3502.3A, and COMNAVSURFPAC/COMNAVSURFLANTINST 3502.5.

3. Scope. This instruction applies to all SURFPAC and SURFLANT ships (CG, DDG 51/1000, LCC, LHA/D, LPD, LSD, MCM, and PC). The unique concept of operations and crew structure for LCS and ESB class ships demand separate training and readiness instructions, for now. Additionally, Naval Beach Groups, Tactical Air Squadrons, and Fleet Surgical Teams are governed by separate instructions.

4. Discussion. The Surface Force Training and Readiness Manual (SFTRM) provides overarching strategy and policy required to generate and sustain surface ship material and operational readiness.

5. Administration. Commander, Naval Surface Force, U.S. Pacific Fleet is responsible for the administration and update of this instruction.

*Surface Force Training Manual* United States. Navy. Atlantic Fleet. Surface Force, United States. Navy. Pacific Fleet. Surface Force, 1996      **Navy Program Guide** United States. Department of the Navy, 2014      **Overseas Basing of U.S. Military Forces** Michael J. Lostumbo, Michael J. McNerney, Eric Peltz, Derek Eaton, David R. Frelinger, 2013-04-15 This independent assessment is a comprehensive study of the strategic benefits risks and costs of U S military presence overseas The report provides policymakers a way to evaluate the range of strategic benefits and costs that follow from revising the U S overseas military presence by characterizing how this presence contributes to assurance deterrence responsiveness and security cooperation goals      **Impacts of the Fleet Response Plan on Surface Combatant Maintenance** Roland J. Yardley, 2006 To achieve a more responsive and more readily deployable fleet of surface combatants the Navy adopted the Fleet Response Plan FRP in 2003 to replace its traditional ship maintenance and readiness cycle The goal of the FRP is to have non deployed ships achieve a high level of readiness earlier and to maintain high readiness longer so that they can deploy on short notice However a challenge of implementing the FRP is establishing the processes and procedures as well as a ready industrial base to facilitate maintenance planning and execution to meet the now unpredictable FRP surge requirements and maintenance demands By concentrating specifically on the DDG 51 class of destroyers the authors of this report look at the effects the FRP has had thus far and determine whether maintenance resources are meeting maintenance demands and whether related industry resources have been coordinated effectively Overall the authors determine that the initiative appears to have promising effects but that more time will be needed to assess maintenance supply and demand apart from the increase of funding tied to military operations post September 11 2001      *Data Systems Technician Training Series* John L. Rowland, 1992      **Amphibious Shipping Shortfalls** Maren Leed, 2014-09-18 In this report the CSIS Harold Brown Chair in Defense Policy Studies analyzes the types of capabilities necessary across the range of military operations and compares that with the characteristics of amphibious ships as well as those in the Combat Logistics Fleet Maritime Prepositioning Force and others Resulting shortfalls in key capability areas suggest some degree of risk The study then describes how amenable those risks may be to mitigation and some of the associated implications This report provides a framework for policymakers to understand those areas in which alternative platforms might be most useful where risks associated with their employment are most significant and how readily broadening platforms beyond the uses for which they were designed might be accomplished      Military Readiness Sharon L. Pickup, 2010-10 Since 2000 the Navy has undertaken a number of initiatives to achieve greater efficiencies and reduce costs For example it has reduced crew sizes on some of its surface ships and has moved from instructor led to more computer based training This report reviews the training size composition and capabilities of the Navy s ship crews It assesses the extent to which the Navy 1 used valid assumptions and standards in determining crew sizes for cruisers and destroyers and 2 has measured the impact of changes to its training

programs incl the time it takes personnel to achieve various qualifications This report analyzed Navy procedures for determining crew size compared to guidance and analyzed current Navy metrics to measure training impact *United States Navy Aviation Mechanics' Training System for Engine Maintenance Force* United States Navy Gas Engine School, New York,1920 **Opticalman 1 & C.** United States. Yardley,2008 U S Navy surface combatant ship crew training involves a combination of shore based onboard pier side and underway training Underway training is expensive however and it increases wear and tear on operating equipment Furthermore constrained budgets and increasing recapitalization costs have forced the Navy to examine various methods such as increased use of simulators to reduce the annual operating costs of the fleet Technological improvements have increased the fidelity and realism of simulators and simulation is being used more widely for training within the U S Navy in other navies and in commercial shipping companies Although the Navy s surface combatant community currently uses simulators in its training regimen an increased use of simulation could potentially improve training efficiency sustain training readiness and reduce underway days Focusing on the DDG 51 Arleigh Burke class of surface combatants RAND examines the training requirements of surface forces determines where credit is granted for the use of simulation estimates what training is done underway examines simulation technology and identifies areas where simulation could be substituted for underway training without any decrease in readiness The authors find that although most exercises are done underway many could be done in port with or without the use of simulators Accordingly the Navy should consider 1 investing in shore based engineering simulators 2 directing that exercises that can be done in port be done in port and 3 accelerating the upgrades that are slowly providing DDG 51 class ships with an embedded engineering training capability publisher s website *Strom Thurmond National Defense Authorization Act for Fiscal Year ...* United States.
