Gillis,2023-12-14 It may sound simple Fashion a set of blades attach them to a generator set the machine on top of a tower and let the wind do the work of creating electricity Not so Most of these attempts fail even with the availability of the latest technologies In **Wind Energy Revolution** Christopher C Gillis Sr examines the efforts to develop small wind generators for use at homes farms and ranches following the 1973

Arab Oil Embargo Wind machines were once featured prominently on farms and homesteads throughout the Midwest of the United States and Canada during the late 1910s through the early 1950s in areas that had no access to overhead electric power transmission lines As a result of rural America's connection to the power grid many of these pioneer wind electric machines fell victim to electrical power lines Interest in wind energy resurfaced in the early 1970s when energy shortages were created by the Arab Oil Embargo the rise of environmentalism and the move toward self sufficient off the grid living Early wind electric machines were dusted off and restored back into service while several former manufacturers reemerged and entrepreneurs developed new designs Political and societal interest in renewable energies wind and solar began to wane in the early 1980s and did not return until the late 1990s Even so the developments in the 1970s influenced how Americans subsequently viewed and used renewable power Wind Energy Revolution is a first of its kind comprehensive history for historians and anyone interested in wind as a viable renewable resource *Semantics of Specification Languages (SoSL)*

Derek J. Andrews, Jan F. Groote, C.A. Middelburg, 2012-12-06 SoSL was the first International Workshop on Semantics of Specification Languages held from 25-27 October 1993 in Utrecht the Netherlands The workshop was organized by the Department of Philosophy of Utrecht University with financial support from the Nationale Faciliteit Informatica of the Nederlandse Organisatie voor Wetenschappelijk Onderzoek NWO and under the auspices of the British Computer Society's specialist group in Formal Aspects of Computing Science BCS FACS The concern of the workshop was the semantics of specification languages and the issues closely related to this area such as type checking and the justification of proof rules and proof obligations Its aim was the exchange of problems and ideas in this field of formal methods and the identification of common programs of work for further investigation The program of SoSL consisted of 3 invited lectures presenting the developments of the semantics of 3 major specification languages Furthermore there were 16 presentations of submitted papers This volume provides a direct account of the workshop It contains 3 papers that match the invited lectures and the 16 selected papers The editors want to thank all those who have contributed to the workshop the Program Committee and the referees for selecting the contributed papers the invited speakers for their interesting talks the Organizing Committee for all their efforts and of course the participants We have the feeling that the workshop was worthwhile and should be repeated
