*The Systematic Experiment* J. C. Gibbings, A. G. Baker, 1986-09-18 This book explains how to plan execute analyse and write up an experiment Experimentation is an essential part of science and engineering being both the basis of discovery in science and an integral part of engineering development The authors aim is to provide instruction in how to perform a systematic experiment from its conception and design through to the communication of results The text opens by laying the ground rules for the planning of an experiment moving on to a description of measurement techniques and statistical analysis of results An important feature of the book is the inclusion of a chapter on the interfacing of experimental equipment to microcomputers

The Wireless Age ,1918      **The Proceedings of the 11th Frontier Academic Forum of Electrical Engineering (FAFEE2024)** Qingxin Yang, Jian Li, 2024-12-02 This book contains the original and refereed research papers presented at the 11th Frontier Academic Forum of Electrical Engineering FAFEE 2024 held in Chongqing China Topics covered include Power System and New Energy Motors and Systems Power Electronics and Electrical Drives High Voltage and Discharge Electrical Energy Storage and Application New Electrical Materials Advanced Electromagnetic Technology The papers share the latest findings in the field of electrical engineering making the book a valuable asset for researchers engineers and university students etc      *Technical Manual* United States Department of the Army, 1965      **Operation and Maintenance of Diesel-electric Locomotives, 1965** ,1965      *AC Circuits and Power Systems in Practice* Graeme Vertigan, 2017-12-18

The essential guide that combines power system fundamentals with the practical aspects of equipment design and operation in modern power systems Written by an experienced power engineer AC Circuits and Power Systems in Practice offers a comprehensive guide that reviews power system fundamentals and network theorems while exploring the practical aspects of equipment design and application The author covers a wide range of topics including basic circuit theorems phasor diagrams per unit quantities and symmetrical component theory as well as active and reactive power and their effects on network stability voltage support and voltage collapse Magnetic circuits reactor and transformer design are analyzed as is the operation of step voltage regulators In addition detailed introductions are provided to earthing systems in LV and MV networks the adverse effects of harmonics on power equipment and power system protection Finally European and American engineering standards are presented where appropriate throughout the text to familiarize the reader with their use and application This book is written as a practical power engineering text for engineering students and recent graduates It contains more than 400 illustrations and is designed to provide the reader with a broad introduction to the subject and to facilitate further study Many of the examples included come from industry and are not normally covered in undergraduate syllabi They are provided to assist in bridging the gap between tertiary study and industrial practice and to assist the professional development of recent graduates The material presented is easy to follow and includes both mathematical and visual representations using phasor diagrams Problems included at the end of most chapters are designed to walk the reader through practical applications of the associated theory

Proceedings of the 2015 International Conference on Electrical and Information Technologies for Rail Transportation Limin Jia,Zhigang Liu,Yong Qin,Rongjun Ding,Lijun Diao,2016-03-11  
The proceedings collect the latest research trends methods and experimental results in the field of electrical and information technologies for rail transportation The topics cover intelligent computing information processing communication technology automatic control and their applications in rail transportation etc The proceedings can be a valuable reference work for researchers and graduate students working in rail transportation electrical engineering and information technologies
