to be race cars Over time sanctioning bodies began to accept sedans and coupes as race cars which created the need for  
chopping tops When competing in dry lakes racing the tall birdcages of cars that had not been chopped created an excessive  
amount of aerodynamic drag Chopping the top increased the aerodynamic efficiency to the point that the coupes were  
competitive with the roadsters Tops aren't often chopped for those reasons today However when viewing the works of art  
that have been created by the best chopping masters it's clear that enhanced aesthetics is the only reason that is needed
