God in the Street Hans Bergmann,1995 In the fast changing culture of antebellum New York writers of every stripe celebrated the City as a stage for the daily urban encounter between the familiar and the inexplicable Probing into these richly varied texts Hans Bergmann uncovers the innovations in writing that accompanied the new market society the penny newspapers grandiose boastings the poetic catalogues of Walt Whitman the sentimental realism of charity workers the sensationalism of slum visitors and the complex urban encounters of Herman Melville s fiction The period in which New York the city itself became firmly established as a subject invented a literary form that attempts to capture the variety of the teeming city and the flaneur the walking observer But Bergmann does not simply lead a parade of images and themes he explores the ways in which these observers understood what was happening around them and to them always attentive to class struggle and race and gender issues God in the Street shows how the penny press and Whitman s New York poetry create a new mass culture hero who interprets and dignifies the city s confusions New York writers both serious and sensationalist meditate upon street encounters with tricksters and confidence men and explore the meanings of encounters Melville s Bartleby the Scrivever underlines the unrelenting isolation and inability to control the interpreter Bergmann reinterprets Melville s The Confidence Man as an example of how a complex literary form arises directly from its own

historical materials and is itself socially symbolic Bergmann sees Melville as special because he recognizes his inability to make sense of the surface of chaotic images and encounters In mid century New York City Melville believes God is in the street unavailable and unrecognizable rather than omnipresent and guiding Author note Hans Bergmann is Professor of English and Cultural Studies at George Mason University

Windows on Mathematical Meanings Richard Noss, Celia Hoyles, 2012-12-06 This book is the culmination of some ten years theoretical and empirical investigation Throughout this period we have come into contact with many who have stimulated our thinking some of whom belong to the community of Mathematics Educators Our membership of that community has challenged us to make sense of some deep issues related to mathematical learning especially the cognitive and pedagogical faces of mathematical meaning making Alongside this community we are privileged to have been part of another whose members are centrally concerned both with mathematics and education Yet many of them might reject the label of Mathematics Educators This community has historically been clustered around what is now called the Epistemology and Learning Group at the Massachusetts Institute of Technology Their work has focused our attention on cognitive science ethnography sociology artificial intelligence and other related disciplines Crucially it has forced our awareness of the construction of computational settings as a crucial component of the struggle to understand how mathematical learning happens We have sometimes felt that few have tried to span both communities Indeed an analysis of the references in the literature would we are sure reveal that the two communities have often ignored each other's strengths One reason for writing this book is born of our hope that we might draw together Mathematics Educators and mathematics educators and assist both communities in recognising that there are insights that might be derived from each other
