behaviors knowledge and attitudes that matter most for high performance And what they discovered may be the biggest shock to conventional sales wisdom in decades Based on an exhaustive study of thousands of sales reps across multiple industries and geographies The Challenger Sale argues that classic relationship building is a losing approach especially when it comes to selling complex large scale business to business solutions The authors study found that every sales rep in the world falls into one of five distinct profiles and while all of these types of reps can deliver average sales performance only one the Challenger delivers consistently high performance Instead of bludgeoning customers with endless facts and features about their company and products Challengers approach customers with unique insights about how they can save or make money They tailor their sales message to the customer s specific needs and objectives Rather than acquiescing to the customer s every demand or objection they are assertive pushing back when necessary and taking control of the sale The things that make Challengers unique are replicable and teachable to the average sales rep Once you understand how to identify the Challengers in your organization you can model their approach and embed it throughout your sales force The authors explain how almost any average performing rep once equipped with the right tools can successfully reframe customers expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and ultimately greater growth

How to Win Customers in the Digital World Peter Vervest, Al Dunn, 2012-12-06 Every organisation must strive for Total Action Winning the customer in today s highly competitive and demanding world is the key to ensuring success All managers and employees profess to understand this yet they find it incredibly difficult to perform together to achieve this The digital world is changing the traditional logic of business we must now act fast and effectively to capture and retain increasingly demanding and sophisticated customers be they individuals or organisations Most customers demand much more than many organisations are able to deliver It is said that the inventor of the telephone believed its main use would be to let someone know that a telegram was arriving Today we know there is a lot more you can do with a telephone and all the surrounding digital business technologies But you must be prepared to re think why you are doing things the way you are And why you are doing them at all This is the starting point for How to win customers in the digital world Total Action or Fatal Inaction The authors confront traditional ways of organising with the capabilities of the new digital business technologies They are critical of the frozen behaviour of today s large organisations They go back to the fundamental goal that business is about making money by satisfying customers
