A Laboratory Activity for the Living Environment

Introduction:

Monarda mollis is a native plant species of grassland. **2000** is considered good for finding native plants of native. Considered for protection and restoration. *Monarda mollis* grows very slowly, which is the challenge of species that make ability to produce seeds in large quantities is limited.

Species that are more closely related to *Monarda mollis* are more likely to produce the important adaptations. Some other plant species that are plants of. It is likely may be related to *Monarda mollis*. You will need to understand the:

- get a **structural and molecular analysis** to determine which plant species is most closely related to the hypothetical species, *Monarda mollis*.
- use this analysis to decide which plant species is most likely to have the most important adaptations.

Pre-Lab

Using the information from the previous introduction, explain the problems we are trying to solve in this lab and how we are going to solve it.

My hypothesis is that the species
