

A stone skull and bones are the central focus of the image. The skull is positioned at the top, with its jaw open, revealing a set of teeth. Below the skull, a long bone, likely a femur, lies horizontally. The entire scene is set against a dark, textured background that resembles a stone wall or a pile of rocks. Scattered around the skull and bone are several autumn leaves in shades of red, orange, and yellow. The lighting is dramatic, highlighting the textures of the stone and the vibrant colors of the leaves.

Supersizing Urban America Chin Jou, 2017-03-15 More than one third of adults in the United States are obese The Centers for Disease Control and Prevention estimates that there are over 112 000 obesity related deaths annually and for many years the government has waged a very public war on the problem Former Surgeon General Richard Carmona warned in 2006 that obesity is the terror within going so far as to call it a threat that will dwarf 9 11 What doesn't get mentioned in all this The fact that the federal government helped create the obesity crisis in the first place especially where it is strikingly acute among urban African American communities *Supersizing Urban America* reveals the little known story of how the U S government got into the business of encouraging fast food in inner cities with unforeseen consequences we are only beginning to understand Chin Jou begins her story in the late 1960s when predominantly African American neighborhoods went from having no fast food chain restaurants to being littered with them She uncovers the federal policies that have helped to subsidize that expansion including loan guarantees to fast food franchisees programs intended to promote minority entrepreneurship and urban revitalization initiatives During this time fast food companies also began to relentlessly market to urban African American consumers An unintended consequence of these developments was that low income minority communities were disproportionately affected by the obesity epidemic In the first book about the U S government's problematic role in promoting fast food in inner city America Jou tells a riveting story of the food industry obesity and race relations in America that is essential to understanding health and obesity in contemporary urban America **Human**

Moran a retired professor of educational philosophy sets the groundwork and then examines a variety of connected issues including birth and death abortion the natural world suffering and pain nonviolence grief and mourning issues of human sexuality responsibility environmentalism and religious education *Missed Opportunities Rethinking Catholic Tradition* guides readers through the depths of the societal challenges facing the Roman Catholic Church By looking carefully at the nature of Catholic tradition and reconsidering how to bring that tradition into conversation with contemporary issues *Missed Opportunities* proposes a pathway for the church to follow to undergo an honest and thorough reform to regain its credibility in the midst of a society grown dubious and to speak to today's issues in a voice consonant with the best resources in the Catholic tradition *Political Campaigns in the United States* Richard K. Scher, 2016-02-19 A Choice Highly Recommended Title January 2017 This book is an interpretive analysis of political campaigns in America instead of focusing on how campaigns are designed and run it investigates the role campaigns play in our American politics and the close symbiosis between campaigns and those politics The text examines how campaigns are an important manifestation of how we do politics in this country Hallmarks of this text include showing how campaigns can undermine our democracy and asking how democratic they are and by extension our politics really are demonstrating that the ability of the media to accurately fairly and deeply report on campaigns has been severely compromised both because of the growing distance between campaigns and media outlets and because of the structure of Big Media corporate ownership and its tight relationship to Big Money It asks important questions about the media including How do the media reporters in particular cover campaigns What pressures and forces shape what and how they present campaigns What is the impact of the ever increasing chasm separating campaigns and the media How does the close tie between corporate mainstream media and Super PAC money affect campaign coverage How does the ability of campaigns and media to segment voters into ever smaller slices influence how campaigns are covered tracking the continuing growth of unregulated private unaccountable dark money in campaigns as a threat to our democratic elections and politics Democracy rests fundamentally on transparency and accountability sunlight and our campaign laws and norms now allow and encourage exactly the opposite largely because of decisions by the United States Supreme Court *The Operating System* Eric Laursen, 2021-05-04 What do we mean when we talk about the State Multiple polls show a growing disillusionment with the State and representative government as vehicles for progressive change and particularly as means to tame capitalism let alone as a basis for seeing beyond it In a quick and readable format Eric Laursen proposes thinking about the State in an entirely new way not simply as government or legal institutions but as humanity's analog to a computer operating system opening up a new interpretation of the system of governance that emerged in Europe five hundred years ago and now drives almost every aspect of human society He also demonstrates powerfully why humanity's life and death challenges including racism climate change and rising economic exploitation cannot be addressed as long as the State continues to exercise dominion *The Lost Spring* Walid Phares, 2014-03-18 One

of the greatest unanswered questions after the massive and violent changes that hit the Middle East in 2011 known to some as the Arab Spring and to others as the Islamist Winter is how the West failed to predict both cataclysmic seasons in world affairs and to meet their challenges The so called spring didn't last long quickly unraveling into a collection of civil wars civil unrest and secessions Phares argues that Washington is too hesitant to take action when necessary that US policy is highly disoriented on counter terrorism efforts and that the effects of these errors have already proven costly In Benghazi US foreign policy failed to see the explosions coming didn't meet the challenges of political transformation where and with whom it should and failed in isolating the Jihadi terrorists worldwide Too many strategic errors were committed In this fascinating new book Phares the only expert who accurately predicted the Arab Spring will foretell a major demise in US and Western policies in the Middle East unless a deep change in strategies and policies are made in Washington and around the world
