Sustainable Retrofitting of Commercial Buildings Richard Hyde, Nathan Groenhout, Francis Barram, Ken Yeang, 2015-01-28 Despite recent improvements in energy efficiency being made in new build it is important that the existing commercial building sector also take action to meet emission reduction targets The objectives and challenges of

such action will reduce the risk of the sector becoming obsolete due to high energy use and poor environmental performance. This book presents a theory based practice support methodology to deal with sustainable retrofitting opportunities for existing commercial buildings in warm climates using bioclimatic design as the basis. The book has four main parts focusing on eco design and renovation bioclimatic retrofitting technological and behavioural change and case studies of retrofitting exemplars. In the first part the context of climate change effects on design and renovation at the city scale is discussed. The second part looks at bioclimatic retrofitting as a design guide for existing buildings highlighting the significance of architectural design and engineering systems for energy performance. The technological and behavioural contexts of the existing building sector policies modelling monitoring and trend analysis in respect to energy and environmental performance are covered in part three. The final part gives some case studies showing the effectiveness of strategies suggested for effective environmental performance. This book is a must have guide for all involved in the design and engineering of retrofitting projects in warm climates.

Concepts, Policies and Technology for Sustainable Buildings Thanuja Ramachandra, Roshani Palliyaguru, Gayani Karunasena, 2025-07-12

This book presents knowledge on sustainability concepts policies and technologies adopted in both developed and developing countries. The book covers five themes: a) advancing sustainability building rating systems b) promoting retrofitting buildings and warranting energy efficient buildings c) realizing water efficiency within building structures d) application of the circular economy to manage waste and e) enhancing the health and well being of building occupants. The first theme includes case study based evidence and solutions to different rating systems used in different countries. The second and third themes mainly focus on the achievement of sustainability under the key parameters of energy efficiency and water efficiency through the application of various techniques and technologies such as green roofs green walls and grid tied solar photovoltaic technology with a special emphasis on retrofitting techniques in different case study contexts. The fourth theme primarily addresses the need to clarify misconceptions surrounding the concept of the circular economy within the construction industry. It explores its broader applications in various contexts aiming to uncover opportunities for knowledge expansion and transfer across different countries. The fifth and final theme of the book addresses various good practices and tools developed to enhance the health and well being of building occupants with a primary focus on how such things help achieve sustainable buildings.
