RCA (Thomson) DOCSIS 3.0 Certified Cable Modem

Features:

- DOCSIS 3.0, 1.1, 2.0 certified
- Bridging between the USB and Ethernet ports
- Easy access to advanced diagnostic web pages
- USB port for easy installation
- Reliable high-performance platform
- Surf the Internet up to 100 times faster than a 56k analog Modem (1)

1. Comparison of downloading speeds between Thomson and other DOCSIS 3.0 certified modems using a 100Mbps network connection. Download speed of 100Mbps is assumed. Actual speeds may vary. See the "Performance Comparison and Diagnostic" and the "User's Manual" for more information. (1) Based on a comparison of downloading speeds between a 56kbps analog modem and a DOCSIS 3.0 certified cable modem. Actual speeds may vary.

RCA's latest DOCSIS 3.0 certified cable modem, the DCM425, merges both the latest generation of silicon. The DCM425 supports up to 18 upstream flows and improved data throughput rates. It represents a significant improvement of our DOCSIS product line in a small form factor.

The 18 upstream flows allow operators to provide burst data services and support more efficient traffic prioritization schemes for advanced services. The DCM425 allows symmetrical data transfer, and higher upstream throughput.

The modem also integrates Proprietary™ technology, enabling the connection of more internet users without additional network bandwidth. RCA's new design is consistent throughout its product line of cable modems and gateways.

DOCSIS Based Design

This cable modem is certified to work on any DOCSIS based HFC cable system (DOCSIS 1.1, DOCSIS 2.0, or DOCSIS 3.0).

Bridging

Allows simultaneous connection of two PCs and enables Ethernet and USB port data traffic bridging.

LED Start-Up Indicators

Five status LED lights on the front of the unit provide the user an intuitive mechanism for verifying the modem's operation and connecting.

Single-to-Use Illustrated Setup Guide

The guide steps users through the connections of the broadband cable, electrical power, and Ethernet or USB cables.

Security

Supports IPsec communications priority to support secure data exchange between modems and cable operator servers.

LED Administrative Disable Indicator

Helps prevent unnecessary troubleshooting.

Internal Web Pages

The DCM425 includes multiple integrated Web pages allowing direct access to information about the status of the modem and product settings including privacy and security.

Internal Security Button

Turning the modem off puts the modem into "security" mode. The modem remains locked to the CMTS, responding to SAAAP, enabling subscribers to resume service quickly when logged again. The button serves as a security feature, assuring the customer that the PC network connection is established when the button is in the off position, alternating security concerns of an "always-on" connection.

Proprietary Technology

This advanced transport technology (Dynamic Payload Header Suppression) provides the subscriber with faster data transfer. It also allows operators to increase the number of subscribers on their system without affecting subscriber connection speeds. Under typical network conditions, both the subscribers and operators can benefit from more data bandwidth per customer, and of more cost efficient for IP-telephony.
