**Supporting Reading in Grades 6-12** Sybil M. Farwell,Nancy L. Teger,2012-06-11 This book presents a curricular framework for students grades 6 12 that school librarians and teachers can use collaboratively to enhance reading skill development promote literature appreciation and motivate young people to incorporate reading into their lives beyond the required schoolwork Supporting Reading Grades 6 12 A Guideaddresses head on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits as well as improve students motivation and test scores The book provides a comprehensive framework for achieving this the READS curriculum which stands for Read as a personal activity Explore characteristics history and awards of creative works Analyze structure and aesthetic features of creative works Develop a literary based product and Score reading progress Each of these five components is explained thoroughly describing how school librarians can encourage students to read as

individuals in groups and as school communities support classroom teachers instruction and connect students to today's constantly evolving technologies. Used in combination with an inquiry information skills model the READS curriculum enables school librarians to deliver a dynamic balanced library program that addresses AASL's Standards for the 21st Century Learner.

*Power Up Your Read-Alouds* Andrea Paganelli, 2019-07-16 Capture the hearts, minds, and attention of your digital age listeners using read aloud experiences that engage technology. I wish my learners would be as excited about reading as they are about technology is a lament frequently sung by those who seek to support reading development. There is no debate that reading is fundamental and that reading aloud strongly supports lifelong reading engagement. Technology however is ubiquitous in our society and engagement with it is essential for our success. Reading and technology are therefore in competition for learners' attention but by combining reading and technology through use of read aloud facilitators can create engaging digital read aloud programs to enhance the learning experience. Digital read aloud can be used with multiple age groups in a variety of settings and with differing degrees of expense and technology complexity. Understanding that these myriad options can be overwhelming however Andrea Paganelli offers detailed information on the background implementation, evaluation, and sustainability of technology infused read aloud for reading support persons, school librarians, public librarians, instructional librarians, teachers, and professors. Her ideas span multiple ages and subjects and include practical examples designed to engage both educators and readers.

[Assessing Students in the Margin](#) Michael Russell, Maureen Kavanagh, 2011-02-01 The importance of student assessment particularly for summative purposes has increased greatly over the past thirty years. At the same time emphasis on including all students in assessment programs has also increased. Assessment programs whether they are large scale district based or teacher developed have traditionally attempted to assess students using a single instrument administered to students under the same conditions. Educators and test developers however are increasingly acknowledging that this practice does not result in valid information inferences and decisions for all students. This problem is particularly true for students in the margins whose characteristics and needs differ from what the public thinks of as the general population of students. Increasingly educators, educational leaders, and test developers are seeking strategies, techniques, policies, and guidelines for assessing students for whom standard assessment instruments do not function well. Whether used for high stakes decisions or classroom based formative decisions the most critical element of any educational assessment is validity. Developing and administering assessment instruments that provide valid measures and allow for valid inferences and decisions for all groups of students presents a major challenge for today's assessment programs. Over the past few decades several national policies have sparked research and development efforts that aim to increase test validity for students in the margins. This book explores recent developments and efforts in three important areas. The first section focuses on strategies for improving test validity through the provision of test accommodations. The second section focuses on alternate and modified assessments. Federal policies now allow testing

programs to develop and administer alternate assessments for students who have not been exposed to grade level content and thus are not expected to demonstrate proficiency on grade level assessments A separate policy allows testing programs to develop modified assessments that will provide more useful information about achievement for a small percentage of students who are exposed to grade level content but for whom the standard form of the grade level test does not provide a valid measure of achievement These policies are complex and can be confusing for educators who are not familiar with their details The chapters in the second section unpack these policies and explore the implications these policies have for test design The third and final section of the book examines how principles of Universal Design can be applied to improve test validity for all students Collectively this volume presents a comprehensive examination of the several issues that present challenges for assessing the achievement of all students While our understanding of how to overcome these challenges continues to evolve the lessons strategies and avenues for future research explored in this book empower educators test developers and testing programs with a deeper understanding of how we can improve assessments for students in the margins
