Photography , **The Perfect Vehicle: What It Is About Motorcycles** Melissa Holbrook Pierson, 2011-01-12 This book a polished winding meditation on the theory and fractiousness of motorcycles celebrates both their eccentric history and the wary pleasures of touring The New Yorker In a book that is a must for anyone who has loved a motorcycle Oliver Sacks Melissa Pierson captures in vivid writerly prose the mysterious attractions of motorcycling She sifts through myth and hyperbole misrepresentations about danger about the type of people who ride and why they do so The Perfect Vehicle is not a mere recitation of facts nor is it a polemic or apologia Its vivid historical accounts the beginnings of the machine the often hidden tradition of women who ride the tale of the defiant ones who taunt death on the racetrack are intertwined with Pierson s own story which in itself shows that although you may think you know what kind of person rides a motorcycle you probably don t

Hoover's JFK Conspiracy Stephen Ladd, 2018-07-25 When I was a young child I was playing with my toys on the floor next to my dad who was sitting in his recliner. He was watching the President on TV. President Kennedy stated: "We will put a man on the moon in this decade." I looked up at my dad and asked: "What is a decade?" My father answered: "That's ten years." I said: "Wow, are we really going to put a man on the moon in ten years?" My father just took a deep breath and said: "Yep, and it's damn fools like me who are going to pay for it." My father was a World War II vet and while he wasn't from Missouri, he was a farmer who only believed what he could see. So why did he believe we were going to the moon when we had barely put a rocket into the air? Because the President said we were. In those days we believed in our President, in our government, and in our military. After all, they had won the war after the Great Depression. We felt that we could do anything that we could imagine. And then it was over.

Neuromarketing Leon Zurawicki, 2010-09-02 Over the last 10 years, advances in the new field of neuromarketing have yielded a host of findings which defy common stereotypes about consumer behavior. Reason and emotions do not necessarily appear as opposing forces. Rather, they complement one another. Hence, it reveals that consumers utilize mental accounting processes different from those assumed in marketers' logical inferences when it comes to time problems with rating and choosing and in post-purchase evaluation. People are often guided by illusions, not only when they perceive the outside world but also when planning their actions, and consumer behavior is no exception. Strengthening the control over their own desires and the ability to navigate the maze of data are crucial skills consumers can gain to benefit themselves, marketers, and the public. Understanding the mind of the consumer is the hardest task faced by business researchers. This book presents the first analytical perspective on the brain and biometric studies which open a new frontier in market research.

Redneck Country...Black Letter Law John Russell Smith, 2010-07-13 Criminal defense attorney J. R. Cuttler begins his Sunday with thoughts of flying his airplane around the East Texas area and later watching his Dallas Cowboys play the hated Washington Redskins. That thought is shattered in an instant when the local radio station reports the abduction and rapes of a twenty-nine-year-old woman and her twelve-year-old cousin from the local Walmart parking lot. The identity of the victims and the initial allegations as to their assailant would draw Cuttler into a capital murder case that would forever change his life and his practice of law. This small, deep East Texas town, located on the Texas-Louisiana border, still lives in times we would all like to forget. Times most of us have fought to forget. Therefore, when two White women are allegedly abducted, beaten, raped, and sodomized by an uppity young Black man, the county digresses into the mindset of Coloreds' use of back doors. After his arrest in another jurisdiction, Lincoln Johnson is beaten beyond

recognition by two deputies returning him to the local jail It is this senseless barbarity that raises Cuttlers ire to the degree that he agrees to represent the accused The development of pre trial tactics the trial and hypnotic conclusion pits modern scientific methodology and old time trial theatrics Electric Motorcycles and Bicycles Kevin Desmond,2018-12-31

Beginning in 1881 isolated prototypes of electric tricycles and bicycles were patented and sometimes tested Limited editions followed in the 1940s but it was not until the lithium ion battery became available in the first decade of this century that urban pedelecs and more powerful open road motorcycles sometimes with speeds of over 200 mph became possible and increasingly popular Today s ever growing fleets of one wheel two wheel and three wheel light electric vehicles can now be counted in the hundreds of millions In this third installment of his electric transport history series the author covers the lives of the innovative engineers who have developed these e wheelers **The Auditory Culture Reader** Michael Bull,Les
