Sources Of Power How People Make Decisions:

Sources of Power Gary A. Klein, 1999-02-18 Anyone who watches the television news has seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims How do these individuals make the split second decisions that save lives Most studies of decision making based on artificial tasks assigned in laboratory settings view people as biased and unskilled Gary Klein is one of the developers of the naturalistic decision making approach which views people as inherently skilled and experienced It documents human strengths and capabilities that so far have been downplayed or ignored Since 1985 Klein has conducted fieldwork to find out how people tackle challenges in difficult nonroutine situations Sources of Power is based on observations of humans acting under such real life constraints as time pressure high stakes personal responsibility and shifting conditions The professionals studied include firefighters critical care nurses pilots nuclear power plant operators battle planners and chess masters Each chapter builds on key incidents and examples to make the description of the methodology and phenomena more vivid In addition to providing information that can be used by professionals in management psychology engineering and other fields the book presents an overview of the research approach of naturalistic decision making and expands our knowledge of the strengths people bring to difficult tasks

Sources of Power Gary A. Klein, 1998-01 An overview of naturalistic decision making which views people as inherently skilled and experienced Sources of Power, 20th Anniversary Edition Gary A. Klein, 2017-09-15 As seen in Malcolm Gladwell's *Blink* the modern groundbreaking classic on effective decision making How people really make decisions by drawing on prior experience and using a combination of intuition and analysis We have all seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims How do these individuals make the split second decisions that save lives Most studies of decision making based on artificial tasks assigned in laboratory settings view people as biased and unskilled In this modern classic Gary A Klein proposes a naturalistic approach to decision making which views people as gaining experience that then enables them to use a combination of intuition and analysis to make decisions To illustrate this approach Klein tells stories of people from pilots to chess masters acting under such real life constraints as time pressure high stakes personal responsibility and shifting conditions Since its publication Sources of Power has been enormously influential The book has sold more than 50 000 copies has been translated into six languages has been cited in professional journals that range from Journal of Marketing Research to Journal of Nursing and is mentioned by Malcolm Gladwell in *Blink* Author Gary Klein has collaborated with Nobel laureate Daniel Kahneman and served on a team that redesigned the White House Situation Room to support more effective decision making The model of decision making Klein proposes in the book has been adopted in many fields including law enforcement training and petrochemical plant operation

Sources of Power Gary A. Klein, 1999 *Safety at the Sharp End* Rhona H. Flin, Paul O'Connor, Margaret Crichton, 2008 Safety at the Sharp End is a general guide to the theory and practice of non technical skills for safety It covers the

identification training and evaluation of non technical skills and has been written for use by individuals who are studying or training these skills on CRM and other safety or human factors courses The material is also suitable for undergraduate and post experience students studying human factors or industrial safety programmes *Disaster Operations and Decision Making* Roger C. Huder, 2013-01-22 The only book to combine emergency management principles with proven military concepts Good disaster plans do not guarantee a good response Any disaster plan rarely survives the first rain bands of a hurricane or the first tremors of an earthquake While developing plans is essential there must be systems in place to adapt these plans to the ever changing operational environment of a disaster Currently there is no set of standard disaster response principles to guide a community The National Incident Management System NIMS and the Incident Command System ICS provide the framework to implement operational decisions but they were never designed as operational concepts The military has developed just such concepts and many of them can be adapted for civilian use Disaster Operations and Decision Making adapts those military concepts and combines them with disaster lessons learned to create a new operational paradigm Emphasizing team building Emergency Operations Center operational systems and situational awareness the book details easily adopted methods All of these methods are designed to be incorporated into the NIMS and ICS framework to enhance a community's response to any type of disaster Disaster Operations and Decision Making is an essential resource for emergency managers fire chiefs law enforcement officers homeland security professionals public health officials and anyone else involved or interested in crisis management Practical Decision Making in Health Care Ethics Raymond J. Devettere, 2009-12-04 For nearly fifteen years Practical Decision Making in Health Care Ethics has offered scholars and students a highly accessible and teachable alternative to the dominant principle based theories in the field Devettere's approach is not based on an ethics of abstract obligations and duties but following Aristotle on how to live a fulfilled and happy life in short an ethics of personal well being grounded in prudence the virtue of ethical decision making This third edition is revised and updated and includes discussions of several landmark cases including the tragic stories of Terri Schiavo and Jesse Gelsinger the first death caused by genetic research Devettere addresses new topics such as partial birth abortion law embryonic stem cell research infant euthanasia in The Netherlands recent Vatican statements on feeding tubes organ donation after cardiac death new developments in artificial hearts clinical trials developed by pharmaceutical companies to market new drugs ghostwritten scientific articles published in major medical journals and controversial HIV AIDS research in Africa This edition also includes a new chapter on the latest social and political issues in American health care Devettere's engaging text relies on commonsense moral concepts and avoids academic jargon It includes a glossary of legal medical and ethical terms an index of cases and thoroughly updated bibliographic essays at the end of each chapter that offer resources for further reading It is a true classic brilliantly conceived and executed and is now even more valuable to undergraduates and graduate students medical students health care professionals hospital ethics committees and

institutional review boards and general readers interested in philosophy medicine and the rapidly changing field of health care ethics
