

## Series 20 Differential Pressure Switches

### General Instructions

*Explosion Proof*

*Weatherproof*

These instructions provide information for installation, electrical connection, process connection and calibration of SOR® Series 20 Differential Pressure Switches.

**Series 20 Differential Principle** Basic construction is a Static "O" Ring diaphragm and piston pressure sensor. Process pressure acts on the diaphragm to produce force  $F_D$  against the piston.  $F_D$  is counteracted by two forces:  $F_L$  which comes from the Lo side Pressure port through the electrical housing, and  $F_S$  which comes from the adjustable range spring. Since the Lo side process media pressurizes the electrical housing, Lo side process media is limited to clean, dry air or inert gas.
