

Part 2 – Sound Waves

Open the [Waves Intro](#) PhET simulation and choose **Sound**. Do not change any of the settings.

14. Push the green button to start the waves. Is this a transverse or longitudinal wave? How do you know?

- ☐ Waves
- ☒ Particles
- ☐ Both

15. Change the setting on the right to “particles.” **In which direction is the wave traveling compared to the disturbance: perpendicular or parallel?** (Switching to the box on the bottom left that sends out one pulse might help if you are unsure. Just be sure to switch it back.)

16. In general, sound travels better through a solid than a gas. Why? Use your experience with the simulation to help you to explain.

Henson, Andrew C. Lee, 2013-06-29 In the past ten years full scale simulation training has become dramatically more evident in undergraduate and graduate medical education This increase has been due primarily to two factors the development of new computer driven technology and an interest in simulation specific training techniques Technologically simulators have evolved from simple anatomical reproductions to full scale accurate reproductions of anatomy and physiology powered by multiple computers High technology simulation centers run by teams of faculty are emerging as integral tools in fulfilling medical centers educational missions In addition educational techniques specific to simulation which have been developed and used by other industries for over half a century

are being applied to medical training Aviation and aerospace have used sophisticated simulation since the 1950s to train pilots and astronauts Extrapolating these methods for use in the medical world has been a natural course of events particularly in specialties that require some of the same basic thought processes and interactions required of the pilot or astronaut It is not surprising then that anesthesiology would be the medical specialty to take the lead in adding simulation training to its educational programs The anesthesiologist's job in the operating room is similar to that of a pilot in a cockpit not in the specific tasks but in decision making technological and human interfaces and crisis management **Distributed Interactive Simulation of Combat** DIANE Publishing Company,1996-09 An assessment of combat modeling recent developments simulators types of simulations the evolution of distributed interactive simulation SIMNET fidelity fog verification validation standards for DIS scalability funding for DIS systems Graphs charts photos *F&S Index United States Annual* ,1999
