Researching the Military Helena Carreiras, Celso Castro, Sabina Frederic, 2016-03-02 Researching the Military focuses on the experiences of researchers who study the military around the world. It explores the historical, social, institutional, and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy. More than merely analyzing research experiences yet necessarily including them, it is also about the experiences of researchers, their position with regard to the object of their studies, the institutional context where they work, and the way their research impacts the academic and policy making fields in the respective countries. The common theme to the various chapters is reflexivity, a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface. By collecting diverse experiences of researchers from across the world, this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena. This book will be of much interest to students of military studies, research methods, sociology, social anthropology, and security studies in general.

The Unintended Consequences of Peace Arie Marcelo Kacowicz, Exequiel Lacovsky, Keren Sasson, Daniel F. Wajner, 2021-07-01 Scholars of international relations generally consider that under conditions of violent conflict and war, smuggling and trans-border crime are likely to thrive. In contrast, this book argues that in fact it is globalisation and peaceful borders that have enabled transnational illicit flows conducted by violent non-state actors, including transnational criminal organizations, drug trafficking organizations, and terrorist cells, who exploit the looseness and demilitarization of borderlands. Empirically, the book draws on case studies from the Americas compared with other regions of the world experiencing similar

phenomena including the European Union and Southeast Europe the Western Balkans Southern Africa and Southeast Asia To explain the phenomenon in itself the authors examine the type of peaceful borders and regimes involved in each case how strong each country is in the governance of their borderlands their political willingness to control their peaceful borders and the prevailing socio economic conditions across the borderlands [A Primer for Teaching Indian Ocean World History](#)
