Department of Defence, 2016 *The Handbook of African Defence and Armed Forces* Evert Kleyhans, Marco Wyss, 2025-03-01 The Handbook of African Defence and Armed Forces provides the first in depth and multifaceted analysis of the evolution and current state of national defence policies strategies doctrines capabilities security challenges and strategic responses of African states and their armed forces Geographically these aspects are investigated at the national sub regional and regional levels Chronologically they are analysed against the backdrop of the superpower withdrawal from the continent in the 1990s and the so called New Scramble for Africa which has seen a crescendo of renewed great power interest in the continent s resources as well as its strategic role location and relevance since the 2000s The book takes a bottom up and African centric approach and is organized around five key themes i the differing security outlooks and defence policies of African powers within the region and the different sub regions ii the strategies doctrines transformation and employment of African armed forces iii the relationship between African armed forces with sub regional regional and international organizations iv the challenges that African states and their armed forces have been facing and their strategic responses and v the position of African perspectives and agency in the context of continental and international security and defence Understanding African security

and defence especially in terms of each individual nation's ability to contribute to peacekeeping operations counterterrorism border security and internal security requires a focus on the national level of armed forces and defence policies this in turn sheds light on sub regional and regional divergences challenges and cooperation Based on this framework the chapters in this volume offer comprehensive African perspectives on African and international security and defence and in doing so show the agency of the continent's countries and armed forces in International Security and Relations *Contemporary Issues in South African Military Psychology* Nicole Dodd, Petrus C. Bester, Justin van der Merwe, 2020-05-13 *Contemporary Issues in South African Military Psychology* is a well timed extremely thought provoking imperative particular to the African context and deals with a highly contemporary issue within the people management and the management studies fields specifically in the military field and context This is specifically of importance as military psychology is a behavioural science that combines theory and practical application Prof Karel Stanz University of Pretoria *South Africa in Transition* Aletta J. Norval, David Howarth, 2016-07-27 *South Africa in Transition* utilises new theoretical perspectives to describe and explain central dimensions of the democratic transition in South Africa during the late 1980s and early 1990s covering changes in the politics of gender and education the political discourses of the ANC NP and the white right constructions of identity in South Africa's black townships and rural areas the role of political violence in the transition and accounts of the democratization process itself *Searching for Boko Haram* Scott MacEachern, 2018-01-02 For the past decade Boko Haram has relentlessly terrorized northeastern Nigeria Few if any explanations for the rise of this violent insurgent group look beyond its roots in worldwide jihadism and recent political conflicts in central Africa *Searching for Boko Haram* is the first book to examine the insurgency within the context of centuries millennia even of cultural change in the region The book surveys the deep history of the lands south of Lake Chad richly documented in archaeology and texts to show how ancient natural and cultural events can aid in our understanding of Boko Haram's present agenda The land's historical narrative stretches back five centuries with cultural origins that plunge even deeper into the past One important feature of this past is the phenomenon of frontiers and borderlands In striking ways Boko Haram resembles the frontier slave raiders and warlords who figure in precolonial and colonial writings on the southern Lake Chad Basin Presently these accounts are paralleled by the activity of smugglers bandits coupeurs de route road cutters and tax evaders The borderlands of these countries are today places where the state often refuses to exercise its full authority because of the profits and opportunities illicit relationships afford state officials and bureaucrats For the local community Boko Haram's actions are readily understandable in terms of slave raids and borderlands They are not mysterious and unprecedented eruptions of violence and savagery but as the book argues recognizable phenomena within the contexts of local politics and history Written from the perspective of an author who has worked in this part of Africa for more than thirty years *Searching for Boko Haram* provides vital historical context to the recent rise of this terroristic force and counters misperceptions of their activities and of the region as a whole *Genomics*

Air Power Jeremy Black, 2016-03-10 This essential book offers a compelling and original interpretation of the rise of military aviation Jeremy Black one of the world's finest scholars of military history provides a lucid analysis of the use of airpower over land and sea both during the two world wars and the more limited wars of the twentieth and twenty first centuries Considering both the theory and praxis of air power the author begins with hot air balloons and then highlights the use of zeppelins piston engine fighters jet bombers and finally the so called Military Revolution of today While discussing the growth of American and European military aviation Black a pioneer in emphasizing the importance of non Western military history for understanding global developments also traces the emergence of air power in Latin America Africa and Asia Black breaks new ground by exploring not only conventional war both inside and outside Europe but also to the use of air power in unconventional wars especially critical given to the spread of insurgencies around the globe He vividly describes traditional debates over the pros and cons of strategic bombing and aircraft carriers versus battleships and gives equal attention to managerial doctrinal and technological innovations The author shows how better management resulted in increasing lethality of close air support of the RAF during the latter part of World War II and at the same times highlights the limits of air power with case studies of the two Gulf Wars The author goes beyond our traditional understanding of air power associated with bombing and fighter engagements adding the important elements associated with naval power including ground logistics support anti aircraft measures and political constraints As he explains air power has become Western

politicians weapon of choice spreading maximum destruction with the minimum of commitment His current and comprehensive study considers how we got to this point and what the future has in store Anyone seeking a balanced accurate understanding of air power in history will find this book an essential introduction *Parliamentary Debates (Hansard)*.

Great Britain. Parliament. House of Commons,1918 **The Economics of Defense Industry** Thomas-Durell

Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis **Service Oriented, Holonic and Multi-Agent Manufacturing Systems for Industry of the Future**
