Contemporary Issues in South African Military Psychology Nicole Dodd, Petrus C. Bester, Justin van der Merwe, 2020-05-13 Contemporary Issues in South African Military Psychology is a well-timed, extremely thought-provoking imperative particular to the African context and deals with a highly contemporary issue within the people management and the management studies fields, specifically in the military field and context. Private Military and Security Contractors Gary Schaub, Jr., Ryan Kelty, 2016-06-16 In Private Military and Security Contractors (PMSCs), a multinational team of scholars and experts address a developing phenomenon: controlling the use of privatized force by states in international politics. Robust analyses of the evolving multi-layered tapestry of formal and informal mechanisms of control address the microfoundations of the market, such as the social and role identities of contract employees, their acceptance by military personnel, and potential tensions between them. The extent and willingness of key states—South Africa, the United States, Canada, the United Kingdom, and Israel—to monitor and enforce discipline to structure their contractual relations with PMSCs on land and at sea is examined, as is the ability of the industry to regulate itself. Also discussed is the nascent international legal regime to reinforce state and industry efforts to encourage effective practices, punish inappropriate behavior, and shape the market to minimize the hazards of loosening states' oligopolistic control over the means of legitimate organized violence. The volume presents a theoretically informed synthesis of micro and macro levels of analysis, offering new insights into the challenges of controlling the agents of organized violence used by states for scholars and practitioners alike.

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security, political, and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented, and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed, and the implications for force procurement, force preparation, force employment, and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment, and retention, military veterans looking at the difficulties they face in reintegrating back into society, and finding gainful

socio political manoeuvring **Sol Plaatje's Mhudi** Sabata-mpho Mokae, Brian Willan, 2021 Sol Plaatje's Mhudi is the first full length novel in English to have been written by a black South African and is widely regarded as one of South Africa's most important literary works. Set in the 1830s it tells the tale of Mhudi and Ra Thaga a romantic story set against a violent backdrop of war between Barolong and Matebele complicated by the intrusions of Boer trekkers with whom the Barolong form an alliance. It is notable among other things for the way Plaatje uses the past to explore the roots of the oppression and injustice suffered by his people a century later when the book was written. Page 4 of cover Manpower and the Armies of the British Empire in the Two World Wars Mark Frost, Andrew L. Brown, Douglas E. Delaney, 2021-06-15 In the first and only examination of how the British Empire and Commonwealth sustained its soldiers before, during and after both world wars a cast of leading military historians explores how the empire mobilized manpower to recruit workers care for veterans and transform factory workers and farmers into riflemen. Raising armies is more than counting people putting them in uniform and assigning them to formations. It demands efficient measures for recruitment, registration and assignment. It requires processes for transforming common people into soldiers and then producing officers, staffs and commanders to lead them. It necessitates balancing the needs of the armed services with industry and agriculture. And often overlooked but illuminated incisively here, raising armies relies on medical services for mending wounded soldiers and programs and pensions to look after them when demobilized. Manpower and the Armies of the British Empire in the Two World Wars is a transnational look at how the empire did not always get these things right. But through trial, error, analysis and introspection it levied the large armies needed to prosecute both wars. Contributors: Paul R. World War I ushered in a renewed scramble for Africa. At its helm Jan Smuts grabbed the opportunity to realize his ambition of a Greater South Africa. He set his sights upon the vast German colonies of South West Africa and East Africa the demise of which would end the Kaiser's grandiose schemes for Mittellafrika. As part of his strategy to shift South Africa's borders inexorably northward Smuts even cast an eye toward Portuguese and Belgian African possessions. Smuts his abilities as a general much denigrated by both his contemporary and then later modern historians was no armchair soldier. This cabinet minister and statesman donned a uniform and led his men into battle. He learned his soldiery craft under General Koos De la Rey's tutelage and another soldier statesman General Louis Botha during the South African War 1899-1902. He emerged from that war immersed in the Boer maneuver doctrine he devastatingly waged in the guerrilla phase of that conflict. His daring and epic invasion of the Cape at the head of his

Nora Hardt,Cameron Harrington,Franziskus von Lucke,Adrien Estève,Nicholas P. Simpson,2023-05-20 The speed and scale of climate change presents unique and potentially monumental security implications for individuals future generations international institutions and states Long dominant security paradigms and policies may no longer be appropriate for dealing with these new security risks of the Anthropocene In response to this phenomenon this book investigates how states have reacted to these new challenges and how their different understandings of the climate security nexus might shape global actions on climate change It focuses on the perceptions framings and policies of climate security by members of the United

Nations Security Council UNSC the world's highest ranking multilateral security forum Empirically the book presents detailed bottom up case studies from local authors of every UNSC member state in 2020 It combines this with an innovative theoretical approach spanning national human and ecological security that helps to capture the complex dynamics of state led approaches to dealing with security in the Anthropocene This book therefore offers readers a compelling picture of climate security politics in the UNSC beyond Council debates and resolutions By comparing and contrasting how different framings of climate security impact various policy sectors of members states the authors are able to assess the barriers and opportunities for addressing climate security locally and globally This timely contribution to the literature on climate security examines the under analysed relationship between the policy approaches of key countries at the national and at the international level Policy alignment at multiple levels of governance will be critical if we are to respond adequately to the ubiquitous challenges posed by climate change and variability Shirley Scott Head of School and Professor School of Humanities and Social Sciences UNSW Canberra at the Australian Defence Force Academy Australia Climate change is increasingly considered a problem of security yet what that means remains deeply contested Behind the rhetoric of climate crisis threats and emergencies UN Security Council members offer profoundly different ideas about what climate change and security mean and what should be done about it This book brilliantly lays out the hidden or overlooked divergences of interests and perspectives on climate security that are playing out in the world's most central security institution as it grapples with securing a climate unstable world Olaf Corry Professor of Global Security Challenges Faculty of Social Sciences School of Politics and International Studies University of Leeds United Kingdom Security is a contested concept whose scope and direction are subject to change The prime value of this volume is the systematic documentation of the dynamics in defining what security is about in reaction to ever dramatic climate change The book's focus on a somewhat representative sample of states the members of the Security Council provides robust evidence that even though many governments remain reluctant to retreat from traditional perceptions of security there is a large and growing acceptance of the need to adjust priorities in providing security in response to climate change and its consequences Michael Brzoska Professor and Senior Research Fellow IFSH Institute for Peace Research and Security Policy Universit t Hamburg Germany The climate security literature has often been labelled as West centric with little recognition of knowledge production processes and different historical socio economic and political experiences of various societies in the Global South This book goes beyond the conventional approaches to provide a whole range of perspectives on climate security reflective of diverse contextual realities covering factors such as development imperatives conflict dynamics postcolonial legacies institutional actor complexities and geopolitical contestations among others By focusing on the climate security approaches of various countries case studies at the domestic and international levels the applicability of existing climate security frameworks or lack thereof in the context of these case studies is brilliantly brought out by the chapters This book weaves together these

diverse perspectives by providing a comprehensive overview of climate security related policies of countries from both Global South and Global North and their positions on climate change and security in the UNSC. They reflect the varying norms, interests, priorities and challenges that continue to shape the climate security agenda within the UNSC as well as non-UNSC platforms. This book is a must read for anyone interested in gaining an in-depth and invigorating understanding of the evolution of distinct climate security discourses and practices in varying contexts.

Climate Security in the Anthropocene provides a timely and compelling account of the conceptualizations of the climate security nexus and their implications. By considering climate security through the lenses of national, human and ecological security, it provides a sophisticated account of the different dimensions involved in the UNSC debates and beyond. The collection of chapters illustrating the positions of the members of the UN Security Council in 2020 not only provide an informative account but also sheds light on the challenges that the UNSC faces in dealing with climate change.

The book *Climate Security in the Anthropocene* is the first systematic assessment of climate security decision making and governance of the UN Security Council. It is groundbreaking as it combines empirical bottom-up case studies of perceptions and policies of different ministries and governmental agencies of UNSC member states with a novel theoretical framework contrasting different security framings and conceptions in the Anthropocene. Discussing various policy sectors, the study assesses barriers and opportunities and provides novel insights on multi-scale responses and interactions in the climate security nexus from local to global levels, connecting individuals, future generations, international institutions and states. The book is highly recommendable for everyone interested in the emerging field of policy-oriented climate security research.

[African Standby Force](#)

François VreA, 2017-10-28
Standby forces of the African Union are expected to deploy rapidly into high intensity conflict zones. Inherently, they stem from and are expected to work effectively with regional militaries of differing capabilities. But first, the AU has to muster the political will to deploy the force at all and do it all on a shoestring budget.

VreA and Mandrup's edited

volume illuminates through the chapter contributions the breadth of challenging political hurdles that the African Union's African Standby Force faces. They do this in clear and readable terms. This important book is imperative for anyone seeking to understand the rapid deployment forces on which African states have optimistically pinned the future of their collective security aspirations.

A Far-Away War Ian Liebenberg, 2016-01-31 South Africa's armed forces invaded Angola in 1975 setting off a war that had consequences for the whole region that are still felt today. *A Far Away War* contributes to a wider understanding of this war in Angola and Namibia. The book does not only look at the war from an old South African Defence Force perspective but also gives a voice to participants on the other side, emphasising the role of the Cubans and Russians. Panic City Martin J. Murray, 2020-03-10 Despite the end of white minority rule and the transition to parliamentary democracy Johannesburg remains haunted by its tortured history of racial segregation and burdened by enduring inequalities in income opportunities for stable work and access to decent housing. Under these circumstances Johannesburg has become one of the most dangerous cities in the world where the yawning gap between the haves and have nots has fueled a turn toward redistribution through crime. While wealthy residents have retreated into heavily fortified gated communities and upscale security estates the less affluent have sought refuge in retrofitting their private homes into safe houses closing off public streets and hiring the services of private security companies to protect their suburban neighborhoods. *Panic City* is an exploration of urban fear and its impact on the city's evolving siege architecture the transformation of policing and obsession with security that has fueled unprecedented private consumption of protection services. Martin Murray analyzes the symbiotic relationship between public law enforcement agencies private security companies and neighborhood associations wherein buyers and sellers of security have reinvented ways of maintaining outdated segregation practices that define the urban poor as suspects.
