The Contemporary German Navy as an Instrument of Foreign Policy Moritz Brake, 2024-12-06 Since the Cold War and beyond the Zeitenwende, Germany has increasingly come to rely on its navy as an instrument of foreign policy. The German Navy supports comprehensive maritime security and ocean governance, and its missions not only reflect its own evolution but also change within Germany. This is a marked shift for the continental power Germany and forms a substantial component of its much broader maritime turn in the 21st century. Changes in strategic context, new security challenges, and Germany's evolving international role after reunification have altered the perception of the navy's utility. Its share in the Bundeswehr's personnel has grown, and the navy has seen proportionally higher investment or relatively less cuts owing to the post-Cold War peace dividend than either army or airforce. The author shows that the navy has markedly changed and become increasingly useful for Germany's foreign policy, something which in the stormy seas of geopolitical escalation of the Zeitenwende has already paid dividends.

The Economics of Defense Industry Thomas-Durell Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis

Salut ,2001 **Laying the BRICS of a New Global Order** Kornegay, Francis A.,Bohler-Muller, Narnia,2013-10-20 The contributions in this compilation on the emergence of a new global order through BRICS serve to illustrate the complexities inherent in the creation of such a coalition alternatively referred to as a grouping association or forum with each country differently situated geo politically as well as ideologically and culturally and in some instances even in conflict with one another in matters of regional peace and security The fact that there are important commonalities of converging interests amongst others the status of emerging economic powers and the furtherance of South South cooperation as well as reforming global governance cannot and should not hide complexities and contradictions These are clearly apparent both within and between the BRICS countries These diversities are also clear from the varied perspectives

of the chapter authors in this compilation which is why we have assembled this collection relatively loosely as a means of expressing our intellectual and analytic convergences and divergences within and across BRICS Each chapter contributor writes from a different discipline country and regional perspective and it is this diversity that enriches the debate and conversation As such there remains enormous room for debate on the subject matter of this book and the diverse contributions open up the parameters of the debate even further The aim is to ensure that scholars commentators and practitioners continue to engage critically with theory and practice related to global multilateralism and BRICS in particular
