work is edited by one of the world's leading experts in X ray imaging physics and technology and has been created with guidance from a Scientific Board containing respected and renowned scientists from around the world. The book's scope includes 2D and 3D X ray imaging techniques from soft X ray to megavoltage energies including computed tomography, fluoroscopy, dental imaging and small animal imaging, with several chapters dedicated to breast imaging techniques. 2D and 3D industrial imaging is incorporated, including imaging of artworks. Specific attention is dedicated to techniques of phase contrast X ray imaging. The approach undertaken is one that illustrates the theory as well as the techniques and the devices routinely used in the various fields. Computational aspects are fully covered, including 3D reconstruction algorithms, hard software, phantoms and computer aided diagnosis. Theories of image quality are fully illustrated. Historical radioprotection, radiation dosimetry, quality assurance and educational aspects are also covered. This handbook will be suitable for a very broad audience, including graduate students in medical physics and biomedical engineering, medical physics residents, radiographers, physicists and engineers in the field of imaging and non destructive industrial testing using X rays, and scientists interested in understanding and using X ray imaging techniques. The handbook's editor, Dr Paolo Russo, has over 30 years' experience in the academic teaching of medical physics and X ray imaging research. He has authored several book chapters in the field of X ray imaging, is Editor in Chief of an international scientific journal in medical physics, and has responsibilities in the publication committees of international scientific organizations in medical physics.

Features
 Comprehensive coverage of the use of X rays both in medical radiology and industrial testing. The first handbook published to be dedicated to the physics and technology of X rays. Handbook edited by world authority with contributions from experts in each field.
