disciplines of signal processing communications and networking PNC is used as a pivot to learn about the fundamentals of signal processing techniques and wireless communications in general We feel that such a problem centric approach will give the reader a more in depth understanding of these disciplines and allow him her to see first hand how the techniques of these disciplines can be applied to solve real research problems As a primer this book does not cover many advanced materials related to PNC PNC is an active research field and many new results will no doubt be forthcoming in the near future We believe that this book will provide a good contextual framework for the interpretation of these advanced results should the reader decide to probe further into the field of PNC Pattern Recognition and Data Mining Sameer Singh, Maneesha Singh, Chid Apte, Petra Perner, 2005-09-16 This LNCS volume contains the papers presented at the 3rd International Conference on Advances in Pattern Recognition ICAPR 2005 organized in August 2005 in the beautiful city of Bath UK
