Scope This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology As with any endeavor it is important to build on the discoveries of our predecessors and not repeat mistakes of the past 1 1 3 Role of the U S Navy The U S Navy is a leader in the development of modern diving and underwater operations The general requirements of national defense and the specific requirements of underwater reconnaissance demolition ordnance disposal construction ship maintenance search rescue and salvage operations repeatedly give impetus to training and development Navy diving is no longer limited to tactical combat operations wartime salvage and submarine sinkings Fleet diving has become increasingly important and diversified since World War II A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry docking Other aspects of fleet diving include recovering practice and research torpedoes installing and repairing underwater electronic arrays underwater construction and locating and recovering downed aircraft *Navy Comptroller Manual* United States. Tritten, Paul N. Stockton, 1992-06-30 This book analyzes President Bush's new Regional Defense Strategy the master plan
that will guide the transformation of U S defense policy for the post Cold War era Most recent books on defense prescribe
how U S policy ought to change or critique past policies without taking Bush's new strategy into account This book takes a
different approach providing the first comprehensive assessment of the new Regional Defense Strategy analyzing the
consequences for U S forces and alliance relations and examining the political difficulties of transforming President Bush's
vision into reality It explains major changes in U S defense doctrine and strategy force and command structure future
programming requirements and the major question of how such a significant change was managed in the United States Much
is new and even radical about the Regional Defense Strategy Bush has built it around the concept of reconstitution under
which the United States will scrap the forces needed to fight a large scale conflict and rely on the ability to create new forces
if such a conflict looms on the horizon However reconstitution will impose demanding requirements on U S intelligence and
the defense industrial base Congress will also have an important say over this proposal and the new national security
strategy as a whole So will U S allies in Europe and the Far East some of whom are already moving to recast the strategy's
proposals for basing U S forces abroad The primary audience of this book is politico military strategic planners and those
interested in organizational theory management of change in large organizations and government policy Narrative
