The Power of Video Studies in Investigating Teaching and Learning in the Classroom Tomáš Janík,Tina Seidel,2009 The history of methods of observation illustrates a gradual development from lay observation to systematic scientific observation Over the past centuries observing scientists have learned to take advantage of various research tools Just as natural scientists came to appreciate the aid of the microscope to observe very small objects and telescopes to observe very distant objects we have come to see video technology as a tool for social scientists to observe phenomena that are too complex to be studied by the naked eye The investigative potential of
