The Patchwork of World History in Texas High

Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de-center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of

STAAR study guide is laid out in a logical and organized fashion so that one section naturally flows from the one preceding it. Because it's written with an eye for both technical accuracy and accessibility, you will not have to worry about getting lost in dense academic language. Any test prep guide is only as good as its practice questions and answer explanations, and that's another area where our guide stands out. The Mometrix test prep team has provided plenty of STAAR practice test questions to prepare you for what to expect on the actual exam. Each answer is explained in depth in order to make the principles and reasoning behind it crystal clear. Many concepts include links to online review videos where you can watch our instructors break down the topics so the material can be quickly grasped. Examples are worked step by step so you see exactly what to do. We've helped hundreds of thousands of people pass standardized tests and achieve their education and career goals. We've done this by setting high standards for Mometrix Test Preparation guides, and our STAAR Test Prep Guide Grade 8 Social Studies is no exception. It's an excellent investment in your future. Get the STAAR review you need to be successful on your exam.

Teaching Data Literacy in Social Studies Tamara L. Shreiner, 2024. We are surrounded by data and data visualizations in our everyday lives. To help ensure that students can critically evaluate data and use it to promote social justice, this book outlines principles and practices for teaching data literacy as part of social studies education. The author shows how social studies content and skills can enhance data literacy and its importance in supporting students' historical thinking and civic engagement. Shreiner also provides a rationale for including data literacy in the social studies curriculum and highlights the special knowledge and skills social studies teachers offer in promoting a critical humanistic form of data literacy. Recognizing that many social studies teachers feel poorly equipped to teach data literacy, this book offers practical advice, summaries of the benefits and challenges to students' guidance for incorporating data literacy across elementary and secondary grades, and strategies to help students analyze, use, and create data visualizations. This important book provides many practical suggestions and powerful visual examples built on sound research that will support educators as they continue to find new ways to integrate data literacy in their history, civics, geography, economics, and other social science classrooms and beyond. Christopher C. Martell, associate professor, University of Massachusetts Boston. Shreiner demonstrates how we use data visualizations to understand and construct arguments about the world around us and provides concrete ideas for how to approach teaching it in social studies classrooms. This book makes teaching data literacy feel relevant, urgent, and most importantly, doable. Sarah McGrew, assistant professor, University of Maryland.
