Brown Collection (Boston Public Library), 1912 The Catalogue of Printed Music in the British Library to 1980 British Library. Department of Printed Books, British Library, Laureen Baillie, 1981 *The Music of Herbert Howells* Phillip A. Cooke, David Nicholas Maw, 2013 Herbert Howells 1892 1983 was a prodigiously gifted musician and the favourite student of the notoriously hard to please Sir Charles Villiers Stanford. Throughout his long life he was one of the country's most prominent composers writing extensively in all genres except the symphony and opera. Yet today he is known mostly for his church music and there is as yet relatively little serious study of his work. This book is the first large scale study of Howells's music affording both detailed consideration of individual works and a broad survey of general characteristics and issues. Its coverage is wide ranging addressing all aspects of the composer's prolific output and probing many of the issues that it raises. The essays are gathered in five sections: Howells the Stylist examines one of the most striking aspects of the composer's music its strongly characterised personal voice; Howells the Vocal Composer addresses both his well known contribution to church music and his less familiar but also important contribution to the genre of solo song; Howells the Instrumental Composer shows that he was no less accomplished for his work in genres without words for which in fact he first made his name; Howells the Modern considers the composer's rather overlooked contribution to the development of a modern voice for British music; and Howells in Mourning explores the important impact of his son's death on his life and work. The composer that emerges from these studies is a complex figure technically fluent but prone to revision and self doubt innovative but also conservative a composer with an improvisational sense of flow who had a firm grasp of musical form an exponent of British musical style who owed as much to continental influence as to his national heritage. This volume comprising a collection of outstanding essays by established writers and emergent scholars opens up the range of Howells's achievement to a wider audience both professional and amateur.
