Clements, 2016-02-11 Responding to Titanic s distress calls in the early hours of 15 April 1912 Captain Arthur Rostron raced the Cunard liner Carpathia to the scene of the sinking rescued the seven hundred survivors of the world s most famous shipwreck and then carried them to safety at New York After twenty five years at sea the competence and compassion Rostron displayed during the rescue made him a hero on two continents and presaged his subsequent achievements During the First World War he participated in the invasion of Gallipoli and commanded Cunard s Mauretania as a hospital ship in the Mediterranean and a troop transport in the Atlantic As her longest serving master he commanded that legendary vessel in transatlantic passenger service through most of the 1920s Rostron retired in 1931 as the most esteemed master mariner of his era celebrated for the Titanic rescue decorated for his war service and knighted for his contributions to British seafaring This account uses newspaper reports company records government documents contemporary publications and memoirs to recount Rostron s seafaring life from his first voyage as an apprentice rounding Cape Horn in sail to his retirement forty four years later as commodore of the Cunard Line Set within the context of his times and featuring particulars of the ships in which he served and commanded this is the first comprehensive biography of Arthur Rostron before during and after his year as captain of the Carpathia *Marconi* Marc Raboy, 2016-06-28 A little over a century ago the world went wireless Cables and all their limiting inefficiencies gave

way to a revolutionary means of transmitting news and information almost everywhere instantaneously By means of Hertzian waves as radio waves were initially known ships could now make contact with other ships saving lives such as on the doomed S S Titanic financial markets could coordinate with other financial markets establishing the price of commodities and fixing exchange rates military commanders could connect with the front lines positioning artillery and directing troop movements Suddenly and irrevocably time and space telescoped beyond what had been thought imaginable Someone had not only imagined this networked world but realized it Guglielmo Marconi As Marc Raboy shows us in this enthralling and comprehensive biography Marconi was the first truly global figure in modern communications Born to an Italian father and an Irish mother he was in many ways stateless working his cosmopolitanism to advantage Through a combination of skill tenacity luck vision and timing Marconi popularized and more critically patented the use of radio waves Soon after he burst into public view at the age of 22 with a demonstration of his wireless apparatus in London 1896 he established his Wireless Telegraph Signal Company and seemed unstoppable He was decorated by the Czar of Russia named an Italian Senator knighted by King George V of England and awarded the Nobel Prize for Physics all before the age of 40 Until his death in 1937 Marconi was at the heart of every major innovation in electronic communication courted by powerful scientific political and financial interests He established stations and transmitters in every corner of the globe from Newfoundland to Buenos Aires Hawaii to Saint Petersburg Based on original research and unpublished archival materials in four countries and several languages Raboy s book is the first to connect significant parts of Marconi s story from his early days in Italy to his groundbreaking experiments to his protean role in world affairs Raboy also explores Marconi s relationships with his wives mistresses and children and examines in unsparing detail the last ten years of the inventor s life when he returned to Italy and became a pillar of Benito Mussolini s fascist regime Raboy s engrossing biography which will stand as the authoritative work of its subject proves that we still live in the world Marconi created The Resurrection of Jesus Michael R Licona,2020-05-21 The question of the historicity of Jesus resurrection has been repeatedly probed investigated and debated And the results have varied widely Perhaps some now regard this issue as the burned over district of New Testament scholarship Could there be any new and promising approach to this problem Yes answers Michael Licona And he convincingly points us to a significant deficiency in approaching this question our historiographical orientation and practice So he opens this study with an extensive consideration of historiography and the particular problem of investigating claims of miracles This alone is a valuable contribution But then Licona carefully applies his principles and methods to the question of Jesus resurrection In addition to determining and working from the most reliable sources and bedrock historical evidence Licona critically weighs other prominent hypotheses His own argument is a challenging and closely argued case for the historicity of the resurrection of Jesus the Christ Any future approaches to dealing with this prize puzzle of New Testament study will need to be routed through The Resurrection of Jesus A Titanic Journey Across the Sea 1912 Laurie

The Rescue of the Third Class on the Titanic David Gleicher,2017-10-18 This work seeks to understand why a disproportionately large number of third class passengers particularly women and children died during the sinking of the Titanic in relation to the first and second classes It examines the gender class social and cultural factors that influenced this disparity It aims to uncover both why and how five hundred and thirty one third class passengers died on the night of April 14th 1912 A key area of focus is the difficult relationship between the ship s authorities and the men of the third class and the extent to which this determined the fate of passengers during the rescue efforts The introduction asks Who were the third class passengers and uses ethnic and economic backgrounds to suggest the third class belonged to the Old Immigration wave of migrants rather than the contemporary New Immigration of the first and second The first chapter concerns the exclusion of third class narratives in the popular story of the Titanic Chapters two through seven determine the whereabouts of the third class during every stage of evacuation and flags the discrepancies in testimonies from both the British and American inquiries Chapter eight provides a conclusion which claims the popular story includes a great many falsehoods with regard to the third class including their treatment by crew their behaviours and their survival rates The first appendix tables nationalities into regions the second outlines the twenty routes to the lifeboats as testified by one of the Titanic design architects and the third provides deck plans for every level of the ship

Titanic and the Mystery Ship Senan Molony, 2011-08-31 As the Titanic was swallowed by a freezing sea over 800 miles from the nearest land her 2 200 passengers and crew attempted desperately to avert tragedy Lifeboats were lowered and constant SOS signals sent but most realised they would require a miracle to avoid their doom And then it came Approaching over the horizon was a ship coming ever closer and then stopping within five or six miles of the Titanic The joy on board the sinking ship was unimaginable the crew even reassured passengers that rescue was imminent Agonisingly however the vessel did not come to the rescue despite rockers of appeal but gradually turned and moved away abandoning over 1 500 people to their fate The search for the Mystery Ship began immediately and both Britain and the USA accused a ship called the Californian of deserting the Titanic in her hour of need But was the Mystery Ship the Californian For the first time this book explores the totality of evidence with the discovery of the Titanic s actual wreck site in 1985 allowing crucial insights not available during official investigations seventy three years earlier Combining a penetrating argument with an extensive collection of archive photographs and materials this book aims to find clear answers to the many riddles of the Titanic s Mystery Ship

When That Great Ship Went Down: The Legal and Political Repercussions of the Loss of RMS

Titanic GMW Wemyss, Markham Shaw Pyle, 2012-04-14 Titanic sank in 1912 in the midst of a US presidential campaign and in the week in which the British government fought to give Home Rule to Ireland JP Morgan whose trusts owned the shipping line became an immediate political target Shares in the Marconi companies credited with saving the survivors rocketed and three members of the British Cabinet had illicit share holdings in Marconis The shipbuilders refused to admit that the 1500

dead had died because their settled scientific consensus and US immigration laws had doomed them And a few staunch lawyers and judges in Britain and America refused to let political corruption and influence sway them from their duties Praised by James Delingpole Anne Elisabeth Moutet this is the story of the skulduggery and shabby compromises of 1912 the eventual revolution in safety measures that came of the disaster and how Titanic sails on in shaping the modern world

The Loss of the S. S. Titanic - Its Story and Its Lessons Lawrence Beesley, 2010-10-15 In this dramatic real life tale Lawrence Beesley tells first hand what it was like to be on the Titanic as it plunged into the icy waters of the North Atlantic on that fateful night in April 1912 Beesley wrote this book and it was published just nine weeks after the disaster Could the Titanic sinking have been averted Was there a fundamental design flaw Did Titanic break in two as it sank Why did so many people die in the disaster Its a story of what went wrong of human endeavour and what lessons were learned First published 1912 and now republished in 2010 by InfoTech Communications UK **Voices from the Carpathia: Rescuing RMS**

Titanic George Behe, 2015-05-04 When Titanic began sending out distress calls one of the first to reply was the Cunard liner Carpathia As it turned out Carpathia was the only vessel to reach the scene in time to save the lives of any of Titanic s passengers and after she arrived in New York reporters crowded the pier and vied with each other to obtain interviews with the survivors of the disaster In their zeal to interview survivors though the reporters brushed past other people who could have provided their own eyewitness accounts namely Carpathia s own passengers largely left to their own devices as to how and when they discussed their participation in events A few wrote letters to relatives others wrote accounts intended for publication The author s collection of these rare written accounts and interviews sheds new light on the tragic way the lives of so many were impacted by the loss of the largest passenger liner in the world The Engineering Index Annual for ..., 1913 Since its creation in 1884 Engineering Index has covered virtually every major engineering innovation from around the world It serves as the historical record of virtually every major engineering innovation of the 20th century Recent content is a vital resource for current awareness new production information technological forecasting and competitive intelligence The world s most comprehensive interdisciplinary engineering database Engineering Index contains over 10 7 million records Each year over 500 000 new abstracts are added from over 5 000 scholarly journals trade magazines and conference proceedings Coverage spans over 175 engineering disciplines from over 80 countries Updated weekly *You are what You Hear* Harry Witchel, 2010 Pondering the musicality of everything from bird songs to the language he calls motherese Dr Witchel illustrates the power of music and addresses the questions Why do we have music What does music do to our emotions Can animals hear and understand music What does music do to your brain Why do people listen to sad music Why do some people like classical but others only like heavy metal Is there some essential feature to all music You Are What You Hear is an erudite and entertaining study that is unique in many ways No other book has thoroughly elaborated the connection between music and social territory in humans although in other music making species scientists have shown this

connection to be clear cut Given the wealth of scientific evidence and historical narratives presented in *You Are What You Hear* an intellectual investigation of this avenue is long overdue Written by a psychobiologist the work straddles hard science and psychology approaching music from a unique interdisciplinary perspective Successfully bridging these strands of evidence *You Are What You Hear* elucidates the significance of territory not only in music but in daily life This lively and engaging book will have a broad appeal not only to the general public but to students interested in the relationship between music and culture Anyone from seventeen to ninety seven will have the potential to gain something from this book One Hundred and Sixty Minutes William Elliott Hazelgrove, 2021-09-01 One hundred and sixty minutes That is all the time rescuers would have before the largest ship in the world slipped beneath the icy Atlantic There was amazing heroism and astounding incompetence against the backdrop of the most advanced ship in history sinking by inches with luminaries from all over the world It is a story of a network of wireless operators on land and sea who desperately sent messages back and forth across the dark frozen North Atlantic to mount a rescue mission More than twenty eight ships would be involved in the rescue of Titanic survivors along with four different countries At the heart of the rescue are two young Marconi operators Jack Phillips 25 and Harold Bride 22 tapping furiously and sending electromagnetic waves into the black night as the room they sat in slanted toward the icy depths and not stopping until the bone numbing water was around their ankles Then they plunged into the water after coordinating the largest rescue operation the maritime world had ever seen and thereby saving 710 people by their efforts The race to save the largest ship in the world from certain death would reveal both heroes and villains It would begin at 11 40 PM on April 14 when the iceberg was struck and would end at 2 20 AM April 15 when her lights blinked out and left 1500 people thrashing in 25 degree water Although the race to save Titanic survivors would stretch on beyond this most people in the water would die but the amazing thing is that of the 2229 people 710 did not and this was the success of the Titanic rescue effort We see the Titanic as a great tragedy but a third of the people were rescued and the only reason every man woman and child did not succumb to the cold depths is due to Jack Phillips and Harold McBride in an insulated telegraph room known as the Silent Room These two men tapping out CQD and SOS distress codes while the ship took on water at the rate of 400 tons per minute from a three hundred foot gash would inaugurate the most extensive rescue operation in maritime history using the cutting edge technology of the time wireless **The Parliamentary Debates (official Report)**.
