

How Do Pyramid Schemes Work?

"A pyramid scheme is a sketchy and unsustainable business model, where a few top-level members recruit newer members. Those members pay upfront costs up the chain to those who enrolled them. As newer members in turn recruit underlings of their own, a portion of the subsequent fees they receive is also kicked up the chain. Often called "pyramid scams," these operations are illegal in some countries." - Andrew Bloomenthal

Common Pyramid Scheme Types

Multi-Level Marketing Pyramid Scheme

Multi-level marketing (MLM) is a legal business practice, but actually involves the sale of goods or services. To generate income, participants must recruit members below them.

Ponzi Scheme

Investment cons that work on the premise of "robbing Peter to pay Paul." The promise of high returns to existing investors by taking investment money from new blood, is tempting and often leads to people losing everything.

Chain Emails

Chain emails persuade naive recipients to donate chunks of money to everyone listed within the email. After making the donations, the donor is invited to delete the first name on the list and replace it with his own, before forwarding the chain along to his own group of contacts, with hopes that one or more of them will send cash his way.
