

## 2013 Application Instructions

### *Imagine Yourself ...*

... learning to track and image a near-earth asteroid with your two teammates, up in the dome after midnight ... writing your own software to calculate its orbit ... working harder and learning faster than you ever thought possible ... and sharing the whole mind-expanding experience with some of the brightest, most interesting friends you'll ever make!

The Summer Science Program is a 39-day residential enrichment program, held on two campuses (one in Southern California, one in New Mexico). Since 1959, talented high school students from diverse backgrounds have come to SSP for its research-based curriculum, stimulating guest lectures, and behind-the-scenes field trips to places like NASA's Jet Propulsion Lab or the Very Large Array (of radio telescopes). The challenging, college-like "SSP experience" accelerates students' academic and personal development, by immersing them in a supportive community of scholars. And, it's a lot of fun!

### *Is SSP for You?*

Are you currently a high school junior (graduating in 2014), now taking calculus or pre-calculus? If so, you're eligible to apply. Sophomores may also apply, although most sophomores should wait a year to avoid being disappointed (see Admissions FAQ at [ssp.org](http://ssp.org)). *Sorry, we do not admit graduating seniors or freshmen under any circumstances.*

The academic program is challenging - lectures in astronomy, physics, calculus, and programming are taught at a college level - but every one of the 36 students receives a very high level of personal attention from the seven resident faculty, so no one is left behind. Teams of three students tackle the asteroid orbit determination research project together. The spirit of collaboration is reinforced by the absence of grades, tests, or formal credit.

To be admitted, you should be earning top grades in the most advanced math & science courses available to you. Your standardized test scores in math and science should also be strong. However, we do not require any particular test, nor do we rank applicants by test scores. We do look for scientific pursuits outside of the classroom, and evidence of good character and motivation. We take into account any personal or family circumstances that may have presented obstacles to your academic achievements. The application will provide an opportunity for you to explain your interests and background.

*The Summer Science Program seeks a diverse enrollment on the basis of gender, ethnicity, citizenship, national origin, and socioeconomic status. Young women, and students from racial and ethnic groups that are traditionally underrepresented in science, are especially encouraged to apply.*

For much more information, including admissions FAQ and comments from hundreds of alumni and parents, visit [www.summerscience.org](http://www.summerscience.org).

### *Choosing a Campus*

SSP takes place at two campuses, starting and ending one week apart:

- on the campus of New Mexico Tech in Socorro, New Mexico (about 70 miles south of Albuquerque), Sunday, June 16 - Wednesday, July 24, 2013
- on the campus of Westmont College in Santa Barbara, CA (about 90 miles northwest of Los Angeles), Sunday, June 23 - Wednesday, July 31, 2013

The curriculum and facilities are largely identical at the two campuses. You will tell us in the online form whether you are applying for a particular campus only, or either campus. You may also indicate a preference. Check your school's academic calendar and ask your parent
