Programme of Studies for the High School (Classic Reprint) Alberta Department of Education,2017-11-08 Excerpt from
Syllabus for General Mathematics 1 2 and 3 of the Programme of Studies for the High School The courses in General
Mathematics are offered to meet the needs of students whose special aptitudes or interests do not lie in the field of
Mathematics but for whom nevertheless some knowledge of fundamental mathematical concepts and the application of these
to practical situations of life will be of value It is also a necessary course for students entering the senior high school with C
standing from Grade IX who desire ultimately to proceed with academic rather than with general subjects and who can
therefore profit from remedial work in Mathematics before undertaking the courses in Algebra 1 and Geometry 1 To meet the
needs of such a divergent group of students the courses in General Mathematics must contain a wide variety of topics from
which the teacher may select those most appropriate to the needs of his class He may give the course a commercial technical
or academic bias As suggested by the Regulations of the Department of Education for the year ending June 1939 he may
dilute the course if he finds it too difficult for his particular class It is funda mental that the teacher decide early in the school
year the particular bias the class will follow and to treat the course accordingly The integration that distinguishes a course in
General Mathe maties from the older courses in specialized subject matter is to be sought not so much in the content as in
the classroom procedure for applying this content in a practical way to the solution of problems on which the student is
working It cannot be stated too emphatically that the teacher is not required to cover any prescribed minimum or core of
work The really important thing is that students be kept working at Optimum efficiency throughout the year on meaningful
problems which have some practical interest for them The aim is not to enforce a standard but to increase the students
understanding and practical efficiency About the Publisher Forgotten Books publishes hundreds of thousands of rare and
classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten
