Valencia,2015-03-05 Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory an asset based perspective

and a systemic inequality approach By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps Following each of these concerns Valencia provides a number of reform suggestions that can lead to systemic transformations of K 12 education Students of Color and the Achievement Gap makes a persuasive and well documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political economic and cultural frameworks *Emergent Bilingual Students and Their Academic Performance* John R. Slate, Clare A. Resilla, 2023-09-07

Emergent Bilinguals formerly known as English Language Learners are one of the fastest growing subgroups in the United States Their educational needs are not well met by the educational system In this book we report results of empirical multiyear studies about their reading and mathematics performance both at the elementary school and high school levels Given that state education agencies collect enormous amounts of information that are typically not well analyzed this book serves as an exemplar of secondary data analyses Educational leaders educational researchers and legislators and policymakers will find the chapters in this book useful Findings from these statewide analyses can provide readers with baselines of the performance of Emergent Bilingual students prior to the Covid 19 pandemic in reading and in mathematics Changes in instructional practices and in educational programming could be made based upon the numerous statistical results present in this book
