Guidebook for Developing and Managing Airport Contracts Kent Vanden Oever, 2011 TRB's Airport Cooperative Research Program ACRP Report 33 Guidebook for Developing and Managing Airport Contracts is a guidebook of best practices for developing soliciting and managing airport agreements and contracts for use by a variety of airports. The agreements referenced in this guidebook range from airline related agreements to communication and utility service as well as common use ground transportation and concessions agreements for a variety of passenger services. An accompanying CD ROM provides sample agreements in each of these areas. The CD ROM included as part of ACRP Report 33 is also available for download from TRB's website as an ISO image. Links to the ISO image and instructions for burning a CD ROM from an ISO image are provided.

Temporary Agency Work and Globalisation Huiyan Fu, 2016-03-03 Despite its geographic and industry expansion as part of the ongoing globalisation of service activity temporary agency work (TAW) is relatively understudied. TAW is characterised by a distinct triangular structure where workers are typically hired by staffing or employment agencies while being dispatched to firms that use them as a type of temporary or non regular labour. This agency mediated labour dispatching as a newly institutionalised industry has registered rapid growth rates over recent decades across vast swathes of the globe. To a great degree TAW is part of a wider structural transformation of work and employment under neoliberalism. Arguably controversy over the expanding non regular workforce is at its most acute when it comes to unsavoury labour selling practices. In this connection TAW is an exemplary field in which to examine today's flexible capitalism and its concomitant phenomenon i.e. inequality. Featuring holistic and interdisciplinary perspectives this edited collection provides a comprehensive overview of TAW in an international context. It reveals how the TAW industry is intertwined with the changing relationship between the state, corporations and labour unions at the institutional structural level and also the perceptions and experiences of ordinary workers in everyday practice. By combining global and local forces macro and micro levels of analysis and theoretical and empirical investigations the book offers fresh insights into recurring issues of labour flexibility and inequality, contributes to practical applications and facilitates fruitful cross national collaborations.

Planning National Telemedicine and Health Hotline Services World Bank,2023-04-13 The coronavirus COVID 19 pandemic underscored the need for many countries to develop more effective and accessible primary health care systems as well as more efficient ways to quickly disperse and collect health information Governments throughout the world regardless of economic status identified the need for robust digital health care solutions as an important element in attaining these goals Telemedicine or health hotline services have shown for more than 60 years that they can help people to receive accurate and timely health information and make informed decisions about when to seek treatment These services offer the ability to provide health information and care remotely thereby extending the reach of the health care system improving efficiencies and enhancing the quality of care Despite telemedicine s well established benefits few nationally scaled telemedicine or health hotline services exist and even fewer are government owned Health services that are stewarded by

governments and embedded into public health systems are more likely to sustain impact at scale. However many digital health solutions are set up for emergency response or with donor funding but are not embedded within the government systems and budgets. Other proposed solutions for national systems fail despite their effectiveness or impact because they are developed without government input and without a plan for government to eventually steward the solution. Planning National Telemedicine and Health Hotline Services: A Toolkit for Governments builds on the existing evidence to help governments establish successful and sustainable nationwide telemedicine or health hotline services. This toolkit lays out a multiphased approach to implementing these services that helps to ensure that governments are fully committed to providing longterm and sustainable services within the framework of the public health system. The phases include the initial assessments through technical considerations setting up and scaling up these services designing and implementing solutions developing strategies and implementation roadmaps and budgets and partnering with the private sector. The toolkit also provides helpful tools for example to cost out and design the system contract with service providers and engage mobile network operators.
