Scientific and Technical Aerospace Reports, 1987 **NBS Special Publication**, 1968 **High Pressure NMR** Jiri Jonas, 2012-12-06 In recent years there has been a major expansion of high pressure research providing unique information about systems of interest to a wide range of scientific disciplines Since nuclear magnetic resonance has been applied to a wide spectrum of problems in chemistry physics and biochemistry it is not surprising to find that high pressure NMR techniques have also had many applications in these fields of science Clearly the high information content of NMR experiments combined with high pressure provides a powerful tool in modern chemistry It is the aim of this monograph in the series on NMR Basic Principles and Progress to illustrate the wide range of problems which can be successfully studied by high pressure NMR Indeed the various contributions in this volume discuss studies of interest to physics chemical physics biochemistry and chemical reaction kinetics In many different ways this monograph demonstrates the power of modern experimental and theoretical techniques to investigate very complex systems The first contribution by D Brinkman deals with NMR and NQR studies of superionic conductors and high T_c superconductors at high pressure Pressure effects on phase transitions detection of new phases and pressure effects on diffusion and spin lattice relaxation represent a few of the topics discussed in this contribution of particular interest to solid state physics **Studying Kinetics with Neutrons** Götz Eckold, Helmut Schober, Stephen E. Nagler, 2009-10-22 Neutrons are extremely versatile probes for investigating structure and dynamics in condensed matter Due to their large penetration depth they are ideal for in situ measurements of samples situated in sophisticated and advanced environments The advent of new high intensity neutron sources and instruments as well as the development of new real time techniques allows the tracking of transformation processes in condensed matter on a microscopic scale The present volume provides a review of the state of the art of this new and exciting field of kinetics with neutrons Catalog of National Bureau of Standards Publications, 1966-1976 United States.
