

Please read the following instructions carefully before installing your Rockustics® Rock speaker. If you have any questions regarding installation that are not answered in the following directions, please contact your local sound contractor, or the Rockustics®/MSE Audio® technical support team.

### Basic Wiring

(Diagram A) Locate speaker wire on the underside of the rock. If necessary, strip the wire ends and trim the wire to the appropriate length. Use the supplied silicone wire nut to connect the positive (red) leads of the speaker and input wires. Repeat this step with the negative (black) leads. Rockustics recommends using 14ga or heavier Direct Burial cable for the connection between the amplifier and speakers.

**NOTE:** The provided wire nuts are meant for permanent installation use only. If you are temporarily wiring the speakers, do not use these wire nuts. In the event you have used wire nuts, and need to re-wire your system, do not attempt to unscrew the nuts. Instead, clip the wires below the nut, and follow the steps in the Basic Wiring section with a new pair of waterproof wire nuts (available at most hardware stores).

### Optimizing Speaker Placement for Best Sound

All Rockustics speakers can generate a high SPL (sound pressure level). Be ready to rock, but be considerate of your neighbors! Maximum acoustic performance should be an important factor in determining speaker placement. Here is how to achieve it:

Diagram A

- 1) Establish where the most likely or average listening position will be.
- 2) The speakers should be placed at or close to the same distance from that point.
- 3) The actual distance between the listening position and the location of the speakers is not critical. However, keep in mind that as the distance between listening area and speaker is increased, there will be a noticeable decrease in perceived volume.
- 4) Be sure to confirm amp power matches the power rating on the speaker. Over-driving the speaker can lead to permanent damage that is not covered under warranty.

### Optimizing Aesthetics with Speaker Placement

All Rockustics products are designed with a boost in high frequency response to accommodate for placement near plants and other landscaping features. Feel free to position the product within your landscaping, camouflaged near bushes or shrubs. Rockustics products strive to blend into
