Roman Numeral Analysis Of Mozart Sonata K333:

Analysis of 18th- and 19th-century Musical Works in the Classical Tradition David Beach, Ryan C. McClelland, 2012

Analysis of 18th and 19th Century Musical Works in the Classical Tradition is a textbook for upper level undergraduate and graduate courses in music analysis. It outlines a process of analyzing works in the Classical tradition by uncovering the construction of a piece of music: the formal, harmonic, rhythmic, and voice leading organizations as well as its unique features. The text develops an in-depth approach that is applied to works by composers including Haydn, Mozart, Beethoven, Schubert, Schumann, and Brahms. The book begins with foundational chapters in music theory, starting with basic diatonic harmony and progressing rapidly to more advanced topics such as phrase design, phrase expansion, and chromatic harmony. The second part contains analyses of complete musical works and movements. The text features over 150 musical examples, including numerous complete annotated scores. Suggested assignments at the end of each chapter guide students in their own musical analysis.

Voice-leading analysis of music 1: the foreground The Open University, This 20-hour free course introduced voice leading or Schenkerian analysis of tonal music, focusing on the foreground level of voice leading.

Music Theory and Composition Stephen C. Stone, 2018-01-26

Music Theory and Composition: A Practical Approach presents a pragmatic, accessible approach to music theory through an emphasis on melody and counterpoint. This focus explains the why of musical construction more clearly than the traditional approach of beginning with chords. By starting with a single melodic line and gradually adding voices in counterpoint, the book drills part-writing while simultaneously explaining functionality, first with scale degrees and then with harmony. The text has students learn musical techniques and progressively build on their functions and importance to create their own compositions. With short, digestible chapters, Music Theory and Composition clearly presents otherwise complicated ideas not as strict rules but as artistic ideals, encouraging the interactive creation of new compositions as a tool for learning. The textbook is versatile and easily customizable, suiting different skill levels with species counterpoint, providing a framework for the beginner while providing an interesting challenge for more experienced students. Different curricular schedules with

complete exercises in two three and four voices allowing for an optional skip from two voices to four Different pedagogical approaches with species exercises encouraging students to consider harmonic choices and figured bass ensuring functional progressions Instructor Resources Instructor s Manual The Instructor s Manual includes sample syllabi and student handouts Test Bank The test bank includes sample tests and answer keys in MS Word format Student Resources Companion Website with Downloadable Workbook Sections <http://textbooks.rowman.com/stone> Additional Features complete curriculum for first year theory courses over 500 musical examples drawn from Common Practice Era compositions as well as more contemporary and popular pieces focus on active composition throughout the text and workbook sections large pop music section to expand student s application of theory conversational tone to encourage student engagement Designed for first year college music theory courses but accessible enough for the interested lay reader or high school student the text offers a true balance of counterpoint and harmony
