of a 1950 through 1969 motorcycle scooter or moped equipped with a Wipac electrical system Wipac issued two ring bound  
versions of this manual The first was titled Number 3 Manual and the second Motorcycle Scooter Manual but unfortunately  
the publication dates of the individual pages were not identified However based on the contents we can estimate that they  
were published in 1964 and 1969 approximately The later manual contains considerably more information plus numerous  
updates to the data in the earlier manual Unfortunately some of the information from the earlier manual was also omitted  
from the later manual as it was probably considered to be outdated However as that outdated information is of significant  
interest to today s owners and restorers we have combined the entire data from both manuals into a single publication Please  
note that wherever the earlier data had been updated we have only included the latest update in order to prevent duplication  
of information This combination manual includes alternator and generator testing and servicing instructions spare parts  
illustrations and part numbers plus Technical Data Sheets and Service Bulletins that provide additional information due to  
model updates and or electronic equipment modifications It also includes wiring diagrams by individual model type including

entire content of this publication is devoted to the operation testing servicing maintenance overhaul and adjustment of all the  
major Wipac electrical components utilized by the various manufacturers listed above Out of print and unavailable for many  
years these manuals are extremely difficult to find on the secondary market and we are pleased to be able to offer this
