The water heats up. After the water heats up for a bit, you can see bubbles that indicate that the water is boiling. Because steam rises from the water, the lid lifts.

2. Why do you think the lid lifts up? Because the steam from the boiling water lifts it up.
3. Now press **Chill** to remove thermal energy from the water. What happens now? The boiling stops and the water level drops. The water's temperature drops, and the water freezes into ice. The lid also drops when it freezes.
