21st century America Once upon a time this moral imperative made sense Breastfeeding was believed to bring multiple health benefits including increased resistance to many chronic and even fatal diseases protection against Sudden Infant Death Syndrome SIDS improved intelligence and countless immunities The irony now however is that breastfeeding continues to gain moral force just as scientists are showing that its benefits have been greatly exaggerated In 2012 the American Academy of Pediatrics and the Center for Disease Control and Prevention declared the failure to breastfeed a public health issue thus placing bottle feeding on par with smoking obesity and unsafe sex Recently politicians too have launched highly visible breastfeeding initiatives such as former New York Mayor Michael Bloomberg s well publicized Latch On campaign And meanwhile women who don t breastfeed their babies have found themselves with a lot of explaining to do

Physicians public health officials and other mothers are pressuring them to breastfeed even though the best science shows that the advantages of doing so are minimal at best What is going on In Lactivism Courtney Jung offers the most deeply researched and far reaching critique of the breastfeeding imperative to date Drawing on a wide range of evidence from rigorously peer reviewed scientific research to interviews with physicians politicians business interests activists social workers and mothers from across the social and political spectrum Jung presents an eye opening account of how a practice that began as an alternative to Big Business has become Big Business itself *The Complete Book of Breastfeeding, 4th edition* Laura Marks M.D., Sally Wendkos Olds, 2010-09-02 The Complete Book of Breastfeeding is a recognized classic in its field Now it s been completely revised and updated in a new fourth edition non doctrinaire informative and friendly it is the most accessible and authoritative book as much required reading for expecting and new mothers as a pregnancy guide and baby name book All healthy mothers should consider breastfeeding for the first year of a baby s life according to the American Academy of Pediatrics and this is the book that will help women give their babies the healthiest start possible Written by Sally Wendkos Olds and a new co author Laura Marks M D The Complete Book of Breastfeeding Fourth Edition offers a comprehensive introduction to breastfeeding how to get ready before the baby arrives how to involve fathers and siblings and the best diet and foods for mom There are sections on dealing with problems at the hospital extensive information on exclusive pumping E P ing the best systems for giving supplementary bottles to a breastfed baby the safest sleep scenarios for babies breastfeeding in public including laws affecting breastfeeding mothers New data about preterm infants is presented and special situations multiples breast cancer overweight and large breasted women breast surgery tattoos and piercings are also discussed in detail An expanded chapter on weaning features sections on breastfeeding past infancy Also new is an appendix of online resources [Latching Well](#) Caroline Conneen, FNP R.D. IBCLC, 2021-03-16 Breastfeeding is a great choice for you and your baby Learn effective and reliable ways to latch and feed well Integrated techniques come from select areas within lactation nutrition and advanced practice nursing Each chapter reveals key skills that work for both mom and baby Delve into this book to learn the secrets of making your experience a success Loaded with practical advice full of real life examples and important questions that mothers ask this book is for you How to latch your baby comfortably and all about baby s suck spot True to life vignettes stories from moms who have been there Safe sleeping guidelines and the truth about skin to skin The intuitive play feed sleep cycle and what it teaches your baby Your baby s age and stage affect feeding and sleep patterns First year feeding of solids with sound nutrition guidelines Q A section featuring answers to questions from real moms Lactation and breastfeeding are among the most sophisticated biological processes occurring in life In many cases they are misunderstood by both the participants in breastfeeding and the healthcare community Caroline Conneen has created a down to earth and easily understandable book that seems to cover every conceivable issue related to breastfeeding As a pharmacist who has worked with the breastfeeding community for over 40

years I am greatly impressed with the simplicity of and yet the depth of the information presented Frank J Nice RPh DPA CPHP Pharmacist Author Speaker and 40 years as a Lactation Expert **Breastfeeding** Melissa Macdonald, Tatyanna Wright, 2011-07-30 Breastfeeding Real Moms Tell You How is a practical warm book with advice and stories from Moms who ve been there to help get your journey underway PREGNANCY BIRTH MAGAZINE BREASTFEEDING REAL MOMS TELL YOU HOW is the number one parenting guide in the Southern hemisphere already helping thousands of mothers through sharing experiences with breast and bottle feeding in Australia New Zealand Singapore and throughout the Far East Now with even more features like video to guide you and the ability to purchase products tried and tested by real moms This book tells you all you ll need to know to feed your baby breast and bottle plus read real stories from moms who could nurse and moms who couldn t It is a no guilt no pressure approach with realistic advice for the modern mom **Design and Development of a Manual Breast Pump** Nur Atiqah Ramlan, 2010 This thesis deals with design and development of a manual breast pump with an ergonomic approach This project is the further study of the previous project which is the preliminary design of the manual breast pump The purpose of this study is to prevent the musculoskeletal disorder problems among mothers who expressed the breast milk using manual breast pump The objectives of this study is to design a manual breast pump with ergonomics approach using Solidworks to make a prototype of the designed manual breast pump using Rapid Prototyping machine and to validate the designed manual breast pump using simulation process and manual calculation The scope of this project is that the developed manual breast pump is only a prototype and is not readily functional as a commercial product While the validations of the manual breast pump through the simulation software is considered precise The strategy of validation of finite element analysis was developed for this project The finite element analysis was then performed using ALGOR and the bottle part of the design was analyzed using the static stress with linear material model The other part of the design which is the pressure pump was also manually calculated The obtained results indicate that the maximum value of the result shows in the bottom of the bottle due to the surface boundary condition The manual calculation of the pressure pump shows that the design just can produce the maximum pressure of about 4 000 Pa While a good manual breast pump should produce at least about 2 000 Pa However the area is not suitable to be reducing in a great number due to the ergonomics condition **A Preliminary Design of the Manual Breast Pump** Nurul Syazrin Roslan, 2009 This study is to design the manual breast pump with an ergonomics approach The problem statement of the study is to solve the musculoskeletal problems among mothers especially those who feed their babies using the manual breast pump Meanwhile the objectives for this study is to design a manual breast pump with an ergonomics approach using the Solidwork and to analyze the designed manual breast pump using the manual calculation The methodology for this project used the survey instrument which is questionnaires and the software for the design stage Result is the chapter where the analysis of the questionnaires that were distributed to the respondents It is also included the analysis of the main part

using the manual calculation Lastly it recovers the conclusion for the project The study hopefully can help the future researcher in order to create and develop the new design for the manual breast pump
