Robogenesis Daniel H. Wilson, 2015-03-17 It's been three years since the global uprising of the world's robots three long years in which ordinary people waged a guerilla war that saved humankind from the brink of annihilation But a horrific new enemy has emerged and the resistance is called to fight once again And in a world where humanity and technology are pushed to the breaking point their one hope may reside with their former enemy Archos R 14 Contemporary Science Fiction by Men Sara Martín, 2025-05-30 Masculinity in Contemporary Science Fiction by Men No Plans for the Future is the first comprehensive study of the self representation of men in SF novels published in the twenty first century by male authors Exploring a broad selection of writers and works the fourteen chapters present a panoramic overview of men's contributions to current SF and explore their slow but noticeable progress in the representation of gender The impact of feminism and gender studies and the demands of readers have profoundly transformed men s SF which now presents far more caring and vulnerable male characters. The old stereotypes are being replaced by a collective reflection on how men and masculinity are changing though the lack of a common agenda results in novels that while exciting and often challenging sometimes miss the chance to imagine a better anti patriarchal pro feminist future for men and for all human beings The authors analysed include Robert Charles Wilson Geoff Ryman Samuel R Delany Richard K Morgan John Scalzi Iain M Banks Ernest Cline James S A Corey Colson Whitehead Andy Weir Daniel H Wilson Ian McDonald Yoon Ha Lee Tade Thompson Neal Stephenson and Kim Stanley Robinson **Encountering the Sovereign Other** Miriam C. Brown Spiers, 2021-12-01 Science fiction often operates as either an extended metaphor for human relationships or as a genuine attempt to encounter the alien Other Both types of stories tend to rehearse the processes of colonialism in which a sympathetic protagonist encounters and tames the unknown Despite this logic Native American writers have claimed the genre as a productive space in which they can critique historical colonialism and reassert the value of Indigenous worldviews Encountering the Sovereign Other proposes a new theoretical framework for understanding Indigenous science fiction placing Native theorists like Vine Deloria Jr and Gregory Cajete in conversation with science fiction theorists like Darko Suvin David Higgins and Michael Pinsky In response to older colonial discourses many contemporary Indigenous authors insist that readers acknowledge their humanity while recognizing them as distinct peoples who maintain their own cultures beliefs and nationhood Here author Miriam C Brown Spiers analyzes four novels William Sanders s The Ballad of Billy Badass and the Rose of Turkestan Stephen Graham Jones s It Came from Del Rio D L Birchfield s Field of Honor and Blake M Hausman's Riding the Trail of Tears Demonstrating how Indigenous science fiction expands the boundaries of the genre while reinforcing the relevance of Indigenous knowledge Brown Spiers illustrates the use of science fiction as a critical compass for navigating and surviving the distinct challenges of the twenty first century **Aspects of Science Fiction** Studies: A Collection of Miscellaneous Articles on the Intersection of Posthumanism, Transhumanism,

Anthropocene, and Post-Anthropocentrism in Some Select, Contemporary Novels Dr. Indrajit Patra, 2021-06-14 The book intends to present a critique of some select 21st Century hard science fiction novels in order to explicate the various ways in which the elements of posthumanism transhumanism techno singularity intersect and interact with other such ideas as monstrosity animality machinicity post anthropocentrism and Anthropocene The study divides its analysis into seven different chapters and attempts to present an elaborate study on various aspects of posthumanism transhumanism and singularity The book despite being a collection of miscellaneous essays actually intends to show how a technologically mediated transhuman posthuman culture will normally be defined by a total dissolution of binaries such as digital and real animal and human and machine and man The book also wants to describe through its analysis of some select hard science fiction novels that man machine merger and creation of hyper immersive virtual reality can function as two of the most effective agents for catalyzing a radically transformative posthuman post scarcity and techno utopian culture The analysis presented in the book is not totally oriented to the discussion of far future implications of accelerated technological progress which is imperative for arriving at a transhuman or posthuman stage rather the book is equally concerned with the implications of rapid technological advancements in our present times and so the study also posits that before ascending to the heights of posthuman status mankind has to cope with the good and bad aspects of the Anthropocene which is the next stage in our collective evolution and journey towards the trans posthuman state The first chapter of this study attempts to bring to focus the phenomenon of a technologically mediated dissolution of the binaries between man animal human nonhuman and subject object which will be extremely important in the analysis of the emergence of a posthuman culture later in the study Technological advancements can be seen here as either conducive towards creating a harmonious relationship between man and animal or through systematic denigration of the agency of the animal it can pave the way for the emergence of monstrosity In Chapter 2 of the book we shall delve deep into the analysis of horror as illustrated in the novels and video games of the Dead Space series Here through a multi theoretical perspective we shall find how horrors and monstrosity can manifest themselves in both written as well as digital virtual media In Chapter 3 we shall delve into the discussion of the power of simulation in the construction of an immersive and hyperreal post transhuman culture where the distinction between real and virtual and material and immaterial vanishes altogether In Chapter 4 we dedicate the entire chapter to the study of Kim Stanley Robinson's systems novel The Ministry for the Future 2020 to attempt a critique of the elements of good and bad Anthropocene Though not directly and intimately related to the study of posthumanism and transhumanism yet a discussion of the elements of the Anthropocene will be of immense contemporary relevance to us The next Chapter i e Chapter 5 will attempt to present an explication of the role of machines in the realization of posthuman culture Chapter 6 is primarily concerned with an analysis of Stephen Baxter s novels to see how posthuman culture is constructed around the agency of the autopoietic machines. The final chapter attempts to present a brief analysis of three of

Iain M Banks Culture novels namely Matter Surface Detail and Hydrogen Sonata to elaborate on the employment of posthuman transhuman tropes in these works Fictions of Land and Flesh Mark Rifkin, 2019-08-23 In Fictions of Land and Flesh Mark Rifkin explores the impasses that arise in seeking to connect Black and Indigenous movements turning to speculative fiction to understand those difficulties and envision productive ways of addressing them Against efforts to subsume varied forms of resistance into a single framework in the name of solidarity Rifkin argues that Black and Indigenous political struggles are oriented in distinct ways following their own lines of development and contestation Rifkin suggests how movement between the two can be approached as something of a speculative leap in which the terms and dynamics of one are disoriented in the encounter with the other Futurist fiction provides a compelling site for exploring such disjunctions Through analyses of works by Octavia Butler Walter Mosley Nalo Hopkinson Melissa Tantaquidgeon Zobel and others the book illustrates how ideas about fungibility fugitivity carcerality marronage sovereignty placemaking and governance shape the ways Black and Indigenous intellectuals narrate the past present and future In turning to speculative fiction Rifkin illustrates how speculation as a process provides conceptual and ethical resources for recognizing difference while engaging Wetware Craig Nova, 2003-04-01 In a chilling near future world in which fully formed humans can be created in across it laboratories Briggs a bio tech engineer with Galapagos Technologies who works with the Wetware system uses creative license to experiment with the Wetware process of creating human bodies an experiment that has a profound impact on human identity and survival Reprint 15 000 first printing
