In addition to a sizeable portfolio of failures, the few economic success stories in the developing world such as South Korea and China have been achieved by rejecting the advice of Western experts. Despite these realities, debates within mainstream development studies have stagnated around a narrow academic emphasis on institutions or the size and role of government. *Cultures of Development* uses a contrapuntal comparison of Vietnam and Brazil to show why it is important for development scholars and practitioners to broaden their conceptualization of economies to include the socio-cultural. This smartly written book based on original ethnographic research breathes new life into development studies by bringing cultural studies into conversation with development studies with an emphasis on improving rather than merely critiquing market economies. The applied deployment of critical development studies, i.e. interpretive economics, results in a number of theoretical advances in both development and area studies demonstrating the economic importance of certain kinds of cultural work carried out by religious leaders.
