The Merlin Gordon A. A. Wilson,2018-12-15 First ever narrative history of the famous aero engine that powered the

Spitfire Hurricane Lancaster Mosquito and Mustang the aircraft that made the difference between victory and defeat at critical moments in the Second World War the Battle of Britain and the allied aerial offensive against Germany **The Clique** ,1978 The Hercules Gordon A. A. Wilson,2024-08-15 What links the Bristol Aeroplane Company Armstrong Whitworth AVRO Short Brothers PLC Handley Page Ltd and Vickers Aviation The Hercules engine **Major Piston Aero-engines of World War II** Victor F. Bingham,1998 The frenzy of technological invention and improvement that accompanied each large scale conflict during the twentieth century has been one of the most important factors in driving the spectacular scientific advances made during the last hundred years The half way point of the century saw the horrors of the first truly global battle World War II At that time the piston aero engine was at its zenith and the world's airforces were almost entirely propeller driven It is a period that provides the most interesting study of these engines and the aircraft they powered because the rapid change to turbojets that occurred in the post war era saw the demise of the piston engine on almost all types of military aircraft and large airliners This book looks at the design and development of the most famous engines used by the combatants during this great air war Each type is studied and evaluated in historical perspective and many famous aircraft are illustrated to demonstrate installation and differing usage One Merlin makes a Spitfire two a Mosquito and four a Lancaster Engines made in America Russia and Germany could boast the same versatility and are described here in detail Book jacket **The Bombing War** Richard Overy,2013-09-26 The ultimate history of the Blitz and bombing in the Second World War from Wolfson Prize winning historian and author Richard Overy The use of massive fleets of bombers to kill and terrorize civilians was an aspect of the Second World War which continues to challenge the idea that Allies specifically fought a moral war For Britain bombing became perhaps its principal contribution to the fighting as night after night exceptionally brave men flew over occupied Europe destroying its cities The Bombing War radically overhauls our understanding of the War It is the first book to examine seriously not just the most well known parts of the campaign but the significance of bombing on many other fronts the German use of bombers on the Eastern Front for example as well as much newly discovered material on the more familiar Blitz on Britain or the Allied campaigns against Italian cities The result is the author's masterpiece a rich gripping picture of the Second World War and the terrible military technological and ethical issues that relentlessly drove all its participants into an abyss Reviews Magnificent must now be regarded as the standard work on the bombing war It is probably the most important book published on the history of the second world war this century Richard J Evans Guardian Monumental this is a major contribution to one of the most controversial aspects of the Second World War full of new detail and perspectives hugely impressive James Holland Literary Review This tremendous book does what the war it describes signally failed to do With a well thought out strategy and precision it delivers maximum force on its objectives The result is a masterpiece of the historian's art The Times It is unlikely that a work of this scale scope and merit will be surpassed Times Higher Education What distinguishes Mr Overy's account of the bombing war from lesser

efforts is the wealth of narrative detail and analytical rigour that he brings to bear Economist Excellent Overy is never less than an erudite and clear eyed guide whose research is impeccable and whose conclusions appear sensible and convincing even when they run against the established trends Financial Times Hard to surpass If you want to know how bombing worked what it did and what it meant this is the book to read Times Literary Supplement About the author Richard Overy is the author of a series of remarkable books on the Second World War and the wider disasters of the twentieth century The Dictators Hitler s Germany Stalin s Russia won both the Wolfson Prize for History and the Hessell Tiltman Prize He is Professor of History at the University of Exeter Penguin publishes 1939 Countdown to War The Morbid Age Russia s War Interrogations The Battle of Britain and The Dictators He lives in London
