The Ashgate Research Companion to Fan Cultures Linda Duits,Koos Zwaan,Stijn Reijnders,2016-04-22 Fans constitute a very special kind of audience They have been marginalized ridiculed and stigmatized yet at the same time they seem to represent the vanguard of new relationships with and within the media Participatory culture has become the new normative standard Concepts derived from early fan studies such as transmedial storytelling and co creation are now the standard fare of journalism and marketing text books alike Indeed usage of the word fan has become ubiquitous The Ashgate Research Companion to Fan Cultures problematizes this exaltation of fans and offers a comprehensive examination of the current state of the field Bringing together the latest international research it explores the conceptualization of the fan and the significance of relationships between fans and producers with particular attention to the intersection between online spaces and offline places The twenty two chapters of this volume elucidate the key themes of the fan studies vernacular As the contributing authors draw from recent empirical work around the globe the book provides fresh insights and innovative angles on the latest developments within fan cultures both online and offline Because the volume is specifically set up as companion for researchers the chapters include recommendations for the further study of fan cultures As such it represents an essential reference volume for researchers and scholars in the fields of cultural and media studies communication cultural geography and the sociology of culture      *Growth, Development and Poverty Alleviation in the Asia-Pacific* Kartik Chandra Roy,Srikanta Chatterjee,2007 This volume presents a variety of papers on issues related to growth development and poverty

prepared by specialists in their particular development related fields While the living standards of most people around the world have improved over time in absolute terms many are still in desperate poverty The major bulk of humanity lives in the continent of Asia and it is here that some of the more spectacular contrasts in both economic growth and levels of affluence and destitution can be found Whether India and China can continue to grow as fast as they have done in recent years remains to be seen More importantly perhaps whether growth alone can reduce poverty in these countries and in others is a question that needs to be discussed and understood Outside of India and China the African continent particularly the nations in Sub Saharan Africa is home to large numbers of poor and deprived humanity Many of these countries are natural resource rich but that has not enabled many of them to achieve adequate growth and reduce poverty As countries grow they put extra pressure on both global resources and the natural environment The question as to whether there are finite limits to economic growth in a global sense is one that has long exercised thinkers Technological progress has often enabled countries to economise on resource use without sacrificing growth Whether that can continue indefinitely is also a question that has acquired a new urgency with the recent faster growth experience of the most populous countries

Global Exposure in East Asia Ming-Chang Tsai, 2016-03-09 In contrast to speculative sweeping literature on globalization Global Exposure in East Asia grounds globalization theories in a detailed empirical analysis providing a systematic investigation of what until now have been grand narratives of huge global phenomena This book presents a micro level explanation of globalization by examining individual global exposure and its influence in the values and perceptions of individuals contending that individual and personal global experience or microglobalization is a key variable in understanding how modern mobile persons act and think in ways different from those who remain geographically immobile and constrained Drawing on detailed empirical evidence from China Japan Taiwan and South Korea Global Exposure in East Asia explores the structures of global exposure and their influences on values and identities in contemporary East Asia A rich comparative and grounded examination of modern theories of globalization this book introduces an innovative perspective that highlights the significance of microglobalization in understanding quotidian lives in a context of ever expanding transnational exchanges and connectivities As such it will appeal to social scientists with interests in globalization cosmopolitanism mobility migration and transnationalism national identity and everyday life

Gateways to Globalisation makes a significant contribution to the understanding of the emerging East Asian regional system of financial centres within the broader global context and how they interact within the global circuits of finance In particular it focuses on the emergence of the financial centres of Tokyo Shanghai Hong Kong and Singapore and the attempts by both national governments and the private sector to position them so that they become more competitive in the global and regional context The volume shows much historical sensitivity showing that while the increase in the importance of these financial centres is principally post 1945 their emergence has been aided by the deep historical roots that go back several centuries The book will be of great value in the interpretation of the role of East Asia in what many commentators have called the Asian Century Terry McGee The University of British Columbia Canada Gateways to Globalisation cogently demonstrates that Hong Kong Singapore Beijing Shanghai and Tokyo operate as gateways to Asia and as linchpins for Asia to the global economy The authors theoretical frameworks and original empirical research support provocative findings that challenge conventional thinking Tokyo may decline as a global city As Beijing and Shanghai ride China's rapid growth they face uncertainty about its future openness to the global economy

Vibrant Hong Kong and Singapore confront challenges from other rising centers David Meyer Washington University in St Louis US This book distinguishes itself in its emphasis on historical and cultural links as well as contemporary globalization processes on large East Asian cities Arising from a research program and four seminars the editor has picked scholars who can relate past and present trends Historical links of Japanese cities are explored Leading world cities in the region are analysed in their evolution from entrepôts to modern gateways service integrators transport hubs and financial centres It is a study of the integration and interrelationships of East Asian cities in the global economy Yue man Yeung Chinese University of Hong Kong Asia's trading and financial hubs have become global cities which frequently have more in common and closer linkages with each other than with their corresponding hinterlands As this book expounds these global cities illustrate to what extent world trends deeply penetrate and permeate the national territorial interiors and processes that were otherwise presumed to be controlled by the State Gateways to Globalisation is soundly based on accurate and extensive research including perspectives from historians economists geographers and sociologists from China Japan Singapore and Hong Kong in order to grasp the regional character of trade and finance beyond national borders and traditional academic frameworks The book documents that today major urban centres such as Tokyo Beijing Singapore Hong Kong and Shanghai situated on the periphery of the maritime corridor of East Asia form a system characterised by the intensity of their economic linkages and integration into the world economy Since the mid 1980s these major Asian cities have become the worldwide oriented centres for production trade finance and research This collective effort offers in addition to its regional framework up to date information that strengthens an original trans disciplinary analysis of a region and its economic characteristics which will be of interest to readers within academia and beyond This well detailed and thorough work will interest academics and post graduate students in economics geography finance history regional studies and Asian studies as well as those who have a general interest in globalisation
