Staples, Nigel Rapport, 2015-03-01 Given the anthropological focus on ethnography as a kind of deep immersion the interview  
poses theoretical and methodological challenges for the discipline This volume explores those challenges and argues that the  
interview should be seen as a special productive site of ethnographic encounter a site of a very particular and important kind  
of knowing In a range of social contexts and cultural settings contributors show how the interview is experienced and  
imagined as a kind of space within which personal biographic and social cues and norms can be explored and interrogated  
The interview possesses its own authenticity therefore true to the persons involved and true to their moment of interaction  
whilst at the same time providing information on human capacities and proclivities that is generalizable beyond particular  
social and cultural contexts      **Middle English Mouths** Katie L. Walter, 2018-06-21 The mouth responsible for both  
physical and spiritual functions eating drinking breathing praying and confessing was of immediate importance to medieval  
thinking about the nature of the human being Where scholars have traditionally focused on the mouth's grotesque excesses  
Katie L. Walter argues for the recuperation of its material everyday aspect Walter's original study draws on two rich archives  
one comprising Middle English theology Langland Julian of Norwich Lydgate Chaucer and pastoral writings the other broadly  
medical and surgical including learned encyclopaedias and vernacular translations and treatises Challenging several critical

the book reveals the centrality of the mouth taste and touch to human modes of knowing and to Christian identity

**Printing Religion after the Enlightenment** Timothy Stanley, 2022-07-26 Over the course of the seventeenth to eighteenth centuries an interior private notion of religion gained wide public recognition It then spread through settler colonial contexts around the world It has since been criticized for its abstract immaterial nature as well as its irrelevance to traditions beyond the European context However such critiques obscure the contradiction between religion's definition as a matter of interior privacy and its public visibility in various printed publications Timothy Stanley responds by re-evaluating the cultural impact of the exterior forms in which religious texts were printed such as pamphlets broadsheets books and journals He also applies that evidence to critical studies of religion shaped by the crisis of representation in the human sciences While Jacques Derrida is oft cited as a progenitor of that crisis the opposite case is made Additionally Stanley draws on Derrida's thought to reframe the relation between a religious text's internal hermeneutic interests and its external forms In sum this book provides a new model of how people printed religion in ways that can be compared to other material cultures around the world

**Handbook of the Sociology of Emotions** Jan Stets, Jonathan H. Turner, 2007-02-25 For almost thirty years sociologists have increasingly theorized about and conducted research on human emotions Surprisingly it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry What makes this late date surprising is that it is now obvious that human behavior interaction and organization are driven by emotions It was an immense oversight for emotions to be de emphasized in sociological theorizing and research for most of its 175 year history Since the 1970s however the study of emotions has accelerated and is now at the forefront of sociological analysis This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs The first section of the book addresses the range of emotions and how they can be classified the neurological underpinnings of emotions and the effect of gender on emotions The second section reviews the prominent sociological theories of emotions including theories emphasizing power and status rituals identity and self psychoanalytic dynamics exchange expectation states and evolution While there is little integration among these theories this state of affairs will not last forever The third section addresses theory and research on specific emotions such as love jealousy and envy empathy sympathy anger grief and the moral

emotions While this list does not exhaust the range of human feeling they are central emotions that drive human behavior interaction and social organization The last section explores how the study of emotions has added new insight into other subfields within sociology such as the study of the workplace health and social movements These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology Although no book can completely cover a field even a relatively new one like the sociology of emotions this Handbook of the Sociology of Emotions comes close to being comprehensive The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years **Spiritual Sensations** Sarah K.

Balstrup, 2020-09-17 The secular pluralist culture of the West encourages a subjective approach to spiritual truth where stimulating emotional experiences such as those provided by film can contribute to personal conceptions of the sacred Examining Stanley Kubrick's 2001 A Space Odyssey 1968 as the principal case study and Gaspar Noé's Enter the Void 2009 and Lars von Trier's Melancholia 2011 as comparative examples Sarah Balstrup argues that these directors harness the affective properties of film to generate altered states of perception in a manner analogous to religious practice Powerful feelings of dissociation and indescribable significance typical of mystical testimony appear in viewer responses to these films demonstrating the continued sacralisation of such states of mind In their own way each film confronts the viewer with an apocalyptic revelation of the impersonal forces of the universe moving away from personhood and the human narrative into pure sensation They present a non-deterministic spiritual truth that can be intuited but not explained mirroring developments in the religious sphere Investigating the relationship between cinematic technique and religious experience Spiritual Sensations offers an alternative approach to the study of religion and film that has been principally focused on narrative symbolism and the dramatisation of values Spiritual Sensations makes a further contribution to the field by analysing films contextually considering viewers' subjective responses in light of religious and cultural change Routledge
