The Urban Tree Duncan Goodwin,2017-04-07 There is a growing evidence base that documents the social environmental and economic benefits that urban trees can deliver Trees are however under threat today as never before due to competition for space imposed by development other hard infrastructures increased pressure on the availability of financial provision from local authorities and a highly cautious approach to risk management in a modern litigious society It is therefore incumbent upon all of us in construction and urban design disciplines to pursue a set of goals that not only preserve existing trees where we can but also ensure that new plantings are appropriately specified and detailed to enable their successful establishment and growth to productive maturity Aimed at developers urban planners urban designers landscape architects and arboriculturists this book takes a candid look at the benefits that trees provide alongside the threats that are eliminating them from our towns and cities It takes a simple applied approach that explores a combination of science and practical experience to help ensure a pragmatic and reasoned approach to decision making in terms of tree selection specification placement and establishment In this way trees can successfully be incorporated within our urban landscapes so that we can continue to reap the benefits they provide

The Motorway Achievement Peter Baldwin,Ron Bridle,Robert Baldwin,John Porter (M.S.),2002 This volume provides a set of contrasting first hand accounts of the creation of the motorway system the problems encountered the solutions adopted and the lessons learned for future motorway development

Traffic-Sign Recognition Systems Sergio Escalera,Xavier Baró,Oriol Pujol,Jordi Vitrià,Petia Radeva,2011-09-22 This work presents a full generic approach to the detection and recognition of traffic signs The approach is based on the latest computer vision methods for object detection

and on powerful methods for multiclass classification The challenge was to robustly detect a set of different sign classes in real time and to classify each detected sign into a large extensible set of classes To address this challenge several state of the art methods were developed that can be used for different recognition problems Following an introduction to the problems of traffic sign detection and categorization the text focuses on the problem of detection and presents recent developments in this field The text then surveys a specific methodology for the problem of traffic sign categorization Error Correcting Output Codes and presents several algorithms performing experimental validation on a mobile mapping application The work ends with a discussion on future research and continuing challenges
