

- For the case of installation in special conditions such as on the wall or ceiling, the specified mounting accessories (18) and service may be required. Before installing the projector, consult your dealer about your installation.
- The screen position may shift after installation if the projector is mounted on locations such as the wall or ceiling, due to the flexibility of the plastic projector body. If readjustment is necessary, consult with your dealer or service personnel.
- The projected image position and/or focus may change during warm-up (approx. 30 minutes after the light source is turned on) or when the ambient conditions change. Readjust the image position and/or focus as necessary.
- Since the projector features an ultra short throw, be aware that it is required to select a screen carefully to have better performance.
  - A soft screen such as a pull-down screen may cause serious distortion of a projected image. A hard screen such as a board screen is recommended for use with this projector.
  - A high-gain screen such as a bead screen that has narrow viewing angle is not suitable for this projector. A low-gain screen (around 1.0) such as a matte screen that has wide viewing angle is recommended for use with this projector.
  - A screen with a weave pattern may cause moire on the projected image, which is not a failure of the projector. A screen that has less moire effects is recommended for use with this projector.

**⚠WARNING ▶** Install the projector in a stable horizontal position.

▶ Place the projector in a cool place, and ensure that there is sufficient ventilation. Keep a space of 50 cm or more between the sides of the projector and other objects such as walls. Do not place or attach anything that would block the projection window or vent holes. Do not place the projector where the air from an air conditioner or similar unit will blow on it directly.

▶ Do not place the projector anywhere where it may get wet.

▶ Use only the mounting accessories the manufacturer specified, and leave installing and removing the projector with the mounting accessories to the service personnel.

▶ Read and keep the user's manual of the mounting accessories used.

**⚠CAUTION ▶** Avoid placing the projector in smoky, humid or dusty place.

▶ Position the projector to prevent light from directly hitting the projector's remote sensor.

**NOTE** • Installation position, picture mode, altitude, and operating environment may affect the brightness of the display.

*African armyworm technical manual* Food and Agriculture Organization of the United Nations, Felege, E.; Hiwot, L.; Rwaheru, M.M.; Mafabi, M.; Moshi, D.; Evarist, M., The African armyworm *Spodoptera exempta* Walker (Lepidoptera: Noctuidae) is a destructive transboundary pest in eastern Africa with outbreaks typically following prolonged drought during the rainy season. Its caterpillars severely damage staple cereal crops such as maize, millet, sorghum, rice, wheat, teff, and barley, as well as sugarcane seedlings and pasture grasses. This poses a significant threat to food security and economic stability, particularly for resource-poor farmers in the region. Agricultural losses from *S. exempta* are frequently severe, ranging from 9 percent at the early whorl stage to complete crop failure at the pre-tassel stage. In 2022, five eastern African countries (Somalia, Kenya, Ethiopia, South Sudan, and Uganda) experienced notable outbreaks. Effective monitoring and surveillance conducted routinely due to the pest's multiple generations are critical for timely control. This technical manual provides essential guidance for extension service providers and farmer communities to manage African armyworm in smallholder cropping systems.
