TPM-Total Productive Maintenance Training

Total Productive Maintenance (TPM) Training Purpose

Want to turn your maintenance function from a simple react and repair function to a reliable system that prevents breakdowns?

Total Productive Maintenance (TPM) is the vehicle to do this!

What is Total Productive Maintenance?

It is a system that breaks up the complexity of equipment therefore allowing operators and maintenance staff to work together to select, correct, and maintain equipment so that breakdowns seldom occur during production.

TPM, Total Productive Maintenance focuses your energies to eliminate downtime and unexpected losses and get productivity back to world-class standards. TPM, Total Productive Maintenance training package will allow you to implement a robust system that focuses on systemizing your maintenance needs. Your employees will develop a customized Total Productive Maintenance system that produces a high Overall Equipment Effectiveness (OEE). This measures the time you need that equipment to meet daily customer demand. TPM, Total Productive Maintenance uses this effective analytical tool as a baseline to benchmark actual customer demand time, not the maximum scheduled production time. With our TPM, Total Productive Maintenance Training Package you can achieve an Overall Equipment Effectiveness (OEE) in the mid to upper 90% without major capital expenditures!

TPM for Workshop Leaders Shirose Kunio, 2017-10-06 Workshop leaders play a central role in your company's efforts to implement TPM. Once your workers have been divided into small groups to learn the fundamentals of TPM, it is the group leader who spearheads ongoing training and implementation activities. With quick reading, people-oriented practicality, this new book addresses the role of the workshop leader in maximizing the benefits of TPM. A top TPM consultant in Japan, Kunio Shirose incorporates cartoons and graphics to convey the hands-on leadership issues of TPM implementation. Uses case studies to reinforce his ideas on training and managing equipment operators in the care of their equipment. Itemizes specific activities that must be undertaken to search out, correct, and control defects to remedy equipment shortcomings. He also addresses the cooperative relationship necessary between maintenance and production and leaves you with an understanding of the three imperatives for successful TPM implementation to change the quality and functioning of the equipment, the way operators think about equipment, and the workplace.
