

Trailer Wiring

Ultimate trailer wiring diagram and electrical trouble shooting information for your trailer. Complete wiring diagrams for 4 way, 5 way, 6 way & 7 way flat connectors.

Before you are able to legally tow your trailer on the road, you'll need to make sure your trailer lights are installed and working properly. This step not only ensures that you will not get pulled over and ticketed, but also significantly reduces your chances of getting into an accident. While most trailers come with the lighting and wiring already installed, we'll cover some of the basics about the wiring/electrical systems on your trailer in the event you ever need to troubleshoot issues, or purchase a replacement. In the event your vehicle was not designed for easy towing, we'll also cover your options for tapping into your existing vehicle wiring harness to install a towing connector.

Trailer Wiring Connectors: The Basics

Trailer wiring connectors are available in systems ranging from four to seven wires/pins that transfer power to the basic lighting and brake functions, as well as additional functions such as backup lights, interior trailer lights, or auxiliary sources requiring power such as a winch. As such, you need to choose your wiring connector based on the number of functions of your trailer. As is often the case, the connector sits under your vehicle. If this is the case, you need to use a mounting brackets to properly attach it. Each wire/pin is color coded based on what function it is typically designed to accommodate:

Trailer Wiring Color Code Chart				HITCH ANYTHING .COM
